Choice Based Credit System (CBCS) and Grade Point Average (GPA)

This BPH curriculum is competency based and follows CBCS and GPA for assessing and grading candidates. The CBCS provides flexibility and cafeteria type approach in which the students can select course of their choice from the prescribed courses. The total minimum credit points for BPH program shall be not less than 60 credits.

Credit: A unit by which the course work is measured.

Credit Hours: Credit hours or unit represent a mathematical summarization of all work completed, and are not the same as the actual classroom contact or instructional hours. One credit is equivalent to 15 hours of study. It could be 3 hours of per week of scheduled class/seminar time and 4 hours of student preparation time. Most of the courses are awarded 4 credit hours. Over an entire semester, it's nearly 60 hours of class time and 120 hours of student preparation.

Cumulative Grade Point Average (CGPA)

It's a measure of overall cumulative performance of a student in various courses in all semesters and the sum of the total credits of all courses in all semesters. It is expressed and rounded up to two decimal places.

Semester Grade Point Average (SGPA): It is a measure of performance of work done in a semester. It is ratio of total credit points secured by the student in various courses registered in a semester and the total course credits taken during that semester. It shall be expressed up to two decimal places.

Letter Grades and Grade Points

Grade Point: It is a numerical weight allotted to each letter grade on a 4-point scale.

Letter Grade: It is an index of the performance of students in a said course. Grades are denoted by letters A, B, C, D, and F.

Percentage	Letter Grade	Grade Point
85% to 100%	A (Excellent)	4
70% to 84%	B (Very Good)	3
56% to 69%	C (Average)	2
50% to 55%	D (Pass)	1
Less than 50%	F (Fail)	0

For non credit courses ‘Satisfactory’ or ‘Unsatisfactory’ shall be indicated instead of the letter grade and this will not be counted for computation of SGPA/CGPA.

Academic Assessment

The assessment would be a continuous process throughout the semester; students must pass in all the assessment process. Equal importance shall be given to all the activities and assignments given in the institution. The academic assessment of student’s performance comprises of three components .Weight and percentage allotted for components for each subject is listed below.

Component	Percentage allotted
Assignment/Projects	15%
Internal Assessment	25%
Final Semester Exams	60%
Total percentage for each subject	100%

Computation of SGPA and CGPA

The SGPA is the ratio of sum of product of the number of credits with the grade points scored by a student in all the courses taken by a student and the sum of the number of credits of all courses undergone by a student, i.e.

$$\text{SGPA} = \frac{\sum(C_i \times G_i)}{\sum C_i}$$

Where C_i is the number of credits of the i th course and G_i is the grade point scored by the student in the i th course.

The CGPA is also calculated in the same manner taking into account all the courses undergone by a student overall the semesters of the program, i.e.

$$\text{CGPA} = \frac{\sum(C_i \times S_i)}{\sum C_i}$$

Where S_i is the SGPA of the i th semester and C_i is total number of credits in that semester.

The SGPA and CGPA shall be rounded off to 2 decimal points and reported in the transcript.

Illustration of Computation of SGPA and CGPA

Example: Student "XYX". Semester 1

Subject	Assignment	Internal Assessment	Final Semester Exam	Total Marks
Subject 1	14	23	55	92
Subject 2	10	20	45	75
Subject 3	13	20	35	68
Subject 4	09	18	30	57
Subject 5	08	15	35	58

Illustration for SGPA

Subject	Credit	Grade	Grade Point	Credit Point (Credit x Grade)
Subject 1	4	A	4	16
Subject 2	4	B	3	12
Subject 3	4	C	2	8
Subject 4	4	D	1	4
Subject 5	4	D	1	4
Total	20			44

Thus, $SGPA = 44/20 = 2.2$

Illustration for CGPA

Semester 1	Semester 2	Semester 3	Semester 4
Credit: 20	Credit: 20	Credit: 20	NA
SGPA: 2.2	SGPA: 3	SGPA :4	NA

Thus, $CGPA = (20 \times 2.2 + 20 \times 3 + 20 \times 4) / (20 + 20 + 20) = 3.0$

Therefore as per calculation Student "XYX" CGPA is 3.0
