Requirement for examination centres.

1. Support of IT Personnel during examination is mandatory.
2. CCTVs (PTZ/IP CAMERAS) with audio facilities shall be available in the exam halls as per specification.
3. CCTVs (PTZ/IP CAMERAS) recording facility shall be made as per specification.
4. Provision for recording video backup of CCTV coverage shall be available
5. Sufficient internet bandwidth is required as per specification
6. Alternate internet connections from different ISPs is required.
7. Question Paper downloading facility shall be available within examination hall/adjacent to examination hall
8. CCTV coverage for Question Paper Downloading activity is mandatory
9. Sufficient number of Photocopying machine is required.
10. Power Backup facilities such as UPS/Generator for minimum 8 hours backup power shall be arranged
11. Scanning room facility with CCTV as per specification is mandatory
12. Hand Held Metal Detectors shall be made available at the centre (Minimum 05) and ensure that all students are checked before entering the Exam Hall
13. Provision shall be available for verifying the students through otoscopy

Infrastructure to be provided by the college to be qualified to have examination center.

Examination Hall:

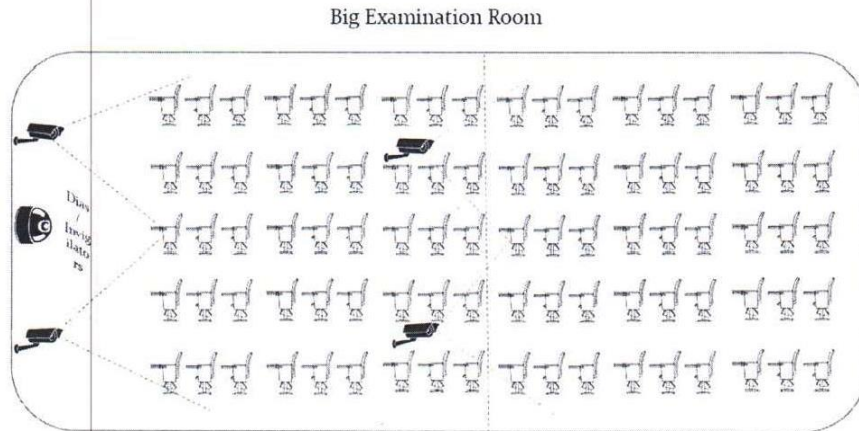

- i. Each examination hall should be equipped with **Fixed and PTZ IP cameras** in order to provide complete coverage of the room. Indicative positioning of cameras is given below:

Each fixed IP camera can cover a distance of up to 50ft length and 18-20 feet width. For a small examination room, 2 fixed cameras and 1 PTZ camera may be used to provide complete coverage of the room.

Option 1: A small examination room can be setup with 2 fixed and 1 PTZ camera.

Option 2: A small examination room can be setup with 2 fixed IP cameras only.

For a big examination room, more fixed IP cameras can be mounted on the ceiling to cover the full length of the room. The two fixed cameras at the front of the room cover area of upto 50 feet, and the other two ceiling mount cameras cover the rest of the room.

Note:The above camera positioning is indicative only. While installing, care must be taken by college to ensure entire examination room is covered completely by the cameras. **Two additional cameras should be installed for every 50 feet.** One additional camera should be installed for **every 18 feet width**. For both width and length coverage it is advised to overlap at least **5 feet** before the end of coverage of one camera (for

Example for the length of 50 feet second set of cameras should be fixed at 40th feet of first set of cameras)The camera specifications are given at the end of this document.

- ii. All the cameras need to be connected to one **PoE network switch** which will provide power and network connectivity to the cameras. The PoE switch should be connected to uninterrupted power source (UPS) so that cameras and the network are always on and are do not go down due to power outages. The cameras should be up and running **24x7** from start date of the exam till last day of exam. Care must be taken to ensure all surveillance infrastructure (cameras, network switch and gateway) are continuously powered on during these days.
- iii. The network switch should be provided with internet connectivity. **The required internet bandwidth speed depends on the number of total cameras being connected in the college. For each camera that is connected, minimum of 1.5Mbps of upload speed is required.** So, if a college has 6 cameras, 9Mbps of internet upload speed should be dedicated for this purpose.
- iv. College must make **one IT person available** for any immediate trouble shooting or support on the days of examination.
- v. **Question paper downloading** must happen in one of the examination rooms at a dedicated area. Care must be taken to ensure this area is clearly visible through the camera(s) placed in that examination room.
 - a. Option 1 – Set up one PTZ camera (of same configuration mentioned above) in the room in order for university to have clear visibility of the downloading and printing process.
 - b. Option 2 – Alternatively provide 2 bullet cameras instead of one PTZ camera in the room.
- vi. For any reason if downloading is happening in a separate room, that room should be within the same building as examinations being conducted and the room should be setup with camera(s) as mentioned above, connected to the same switch and network as the examination room cameras.
- vii. **College must provide a room for answer scripts scanning.** This room should be covered by camera(s) connected to the same switch and network.
 - a. Option 1 – Set up one PTZ camera (of same configuration mentioned above) in the room in order for university to have clear visibility of the papers being scanned.
 - b. Option 2 – Alternatively provide 2 bullet cameras instead of one PTZ camera in the room. This will provide overview of the room, but may not be possible to see the answer scripts clearly from university (as there will be no optical Zoom).

- Viii Local recording and stream device: College should provide **one dedicated system running Ubuntu 20.04 operating system** – which will be used to provide the feed to university securely without the need for any static public IP.
 - a. Option 1: Recent generation core i3 processor with 8GB RAM or higher – Supports up to 16 cameras.
 - b. Option 2: Recent generation core i5 processor with 16GB RAM or higher – Supports up to 32 cameras.

- ix Camera Specifications:
 - a. Fixed Cameras: IP Cameras (bullet or dome) with onvif profile s compliant with IR, POE, 1920x1080 or higher resolution. Should have audio capability with good quality mic input.
 - b. PTZ Cameras : Besides the points mentioned for fixed cameras, PTZ camera should have 10x or higher optical zoom,360° Pan and 120° or higher Tilt.
