

VISED ORDINANCE GOVERNING  
REGULATIONS & CURRICULUM FOR BACHELOR OF SCIENCE DEGREE COURSES  
IN  
ALLIED HEALTH SCIENCE FOR FIRST YEAR  
**B.Sc Respiratory Care Technology**

**1. Title of the Courses offered in Allied Health Sciences:**

1. Bachelor of Science in Medical Laboratory Technology [B.Sc. (M.L.T) ]
2. Bachelor of Science in Operation Theatre Technology [ BSc .O.T. Technology]
3. Bachelor of Science in Cardiac CareTechnology [ B.Sc Cardiac CareTechnology ]
- 4 .Bachelor of Science in PerfusionTechnology [ BSc. PerfusionTechnology ]
5. Bachelor of Science in Neuro Science Technology [ BSc. Neuro Science Technology ]
6. Bachelor of Science in . Renal Dialysis Technology [ BSc. Renal Dialysis Technology ]
7. Bachelor of Science in Respiratory Care Technology [ BSc. Respiratory Care Technology]
8. Bachelor of Science in Anaesthesia Technology [ BSc. Anaesthesia Technology]
9. Bachelor of Science in Imaging Technology [ BSc. Imaging Technology ]
10. Bachelor of Science in Radiotherapy Technology [ BSc. Radiotherapy Technology ]

**2. Eligibility for admission:**

A candidate seeking admission to the Bachelor of Science Degree Courses in the Allied Health Sciences course from Sl.No. 1 to 10 shall have studied English as one of the principal subject during the tenure of the course and for those seeking admission to the Bachelor of Science Degree Courses in the Allied Health Sciences courses from Sl.No. 1 to 8 mentioned above except for B.Sc. Imaging Technology and B.Sc. Radiotherapy Technology shall have passed:

1. Two year Pre-University examination or equivalent as recognized by Rajiv Gandhi University of Health Sciences with, Physics, Chemistry and Biology as principle subjects of study.

OR

2. Pre-Degree course from a recognized University considered as equivalent by RGUHS, (Two years after ten years of schooling) with Physics, Chemistry and Biology as principal subjects of study.

OR

3. Any equivalent examination recognized by the Rajiv Gandhi University of Health Sciences, Bangalore for the above purpose with Physics, Chemistry and Biology as principal subjects of study.

OR

4. The vocational higher secondary education course conducted by Vocational Higher Secondary Education, Government of Kerala with five subjects including Physics, Chemistry, Biology and English in addition to vocational subjects conducted is considered equivalent to plus TWO examinations of Government of Karnataka Pre University Course.

OR

5. Candidates with two years diploma from a recognized Government Board in a subject for which the candidate desires to enroll, in the respective Allied Health Sciences course mentioned in Sl. No. 1 to 10 shall have passed plus 12 [10+2] with Physics, Chemistry and Biology, as principal subjects or candidates with 3 years diploma from a recognized Government Board in a subject for which the candidate desires to enroll, in the respective Allied Health Sciences course mentioned in Sl. No. 1 to 10 should have studied Physics, Biology and Chemistry as principal subjects during the tenure of the course.
6. Lateral entry to second year for allied health science courses for candidates who have passed diploma program from the Government Boards and recognized by RGUHS, fulfilling the conditions specified above under sl. No. 5 and these students are eligible to take admission on lateral entry system only in the same subject studied at diploma level from the academic year 2008-09 vide RGUHS Notification no. AUTH/AHS/317/2008-09 dated 01.08.2008.
7. In case of admission to B.Sc. Imaging Technology or B.Sc. Radiotherapy Technology the candidate should have passed Pre-University or equivalent examination with Physics, Chemistry, Biology and Mathematics, as principal subjects of study.

**Note:**

- a. The candidate shall have passed individually in each of the principal subjects.
  - b. Candidates who have completed diploma or vocational course through Correspondence shall not be eligible for any of the courses mentioned above.
3. Duration of the course:  
Duration shall be for a period of three and half years including six months of Internship.
  4. Medium of instruction:  
The medium of instruction and examination shall be in English.
  5. Scheme of examination:  
There shall be three examinations one each at the end of 1<sup>st</sup> , 2<sup>nd</sup> and 3<sup>rd</sup> year.

## 6. Attendance

Every candidate should have attended at least 80% of the total number of classes conducted in an academic year from the date of commencement of the term to the last working day as notified by university in each of the subjects prescribed for that year separately in theory and practical. Only such candidates are eligible to appear for the university examinations in their first attempt. Special classes conducted for any purpose shall not be considered for the calculation of percentage of attendance for eligibility. A candidate lacking in prescribed percentage of attendance in any subjects either in theory or practical in the first appearance will not be eligible to appear for the University Examination in that subject .

## 7. Internal Assessment (IA) :

Theory - 20 marks.

Practical - 20 marks. [Lab work- 12 marks and Record-8 marks]

There shall be a minimum of two periodical tests preferably one in each term in theory and practical of each subject in an academic year. The average marks of the two tests will be calculated and reduced to 20. The marks of IA shall be communicated to the University at least 15 days before the commencement of the University examination. The University shall have access to the records of such periodical tests.

The marks of the internal assessment must be displayed on the notice board of the respective colleges with in a fortnight from the date test is held.

If a candidate is absent for any one of the tests due to genuine and satisfactory reasons, such a candidate may be given a re-test within a fortnight.

**\* There shall be no University Practical Examination in First year.**

## 8. Subject and hours of teaching for Theory and Practicals

The number of hours of teaching theory and practical subject wise in first year, second year and third year are shown in Table-I, Table-II and Table-III

Main and Subsidiary subjects are common in first year for all the courses in Allied Health Science.

The number of hours for teaching theory and practical for main subjects in first ,Second and Third year are shown in Table-I, II and III.

**Table - I Distribution of Teaching Hours in First Year Subjects**

Main Subjects

S L No	Subject	Theory No. of Hours	Practical No. of Hours	Total No. of Hours
1	Human Anatomy	70	20	90
2	Physiology	70	20	90
3	Biochemistry	70	20	90
4	Pathology-[Clinical pathology, Haematology & Blood –Banking	70	20	90
5	Microbiology	70	20	90
	Total	350	100	450

The classes in main and subsidiary subjects are to be held from Monday to Thursday. On Fridays and Saturdays students shall work in hospitals in the respective specialty or department chosen by them

Subsidiary Subjects

English 25 Hours

Kannada 25 Hours

Health-Care 40 Hours

Hospital posting – 470 Hours Fri day 9am – 1pm and 2pm - 4-30 pm

Saturday 9am - 1pm

**Table - II Distribution of Teaching Hours in Second Year Subjects**

## Main Subjects

S L No	Subject	Theory No. of Hours	Practical No. of Hours	Clinical posting	Total No. of Hours
1	Medicine relevant to Respiratory technology	50	--	--	50
2	Section A Applied Pathology Section B Applied Microbiology	30 30	30 30	--	120
3	Pharmacology	50	--	--	50
4	Introduction to Respiratory Technology	80	100	650	830
	Total	240	160	650	1050

## Subsidiary Subjects

Sociology	20 Hours
Constitution of India	10 Hours
Environmental Science & Health	10 Hours

**Table - III Distribution of Teaching Hours in Third Year Subjects**

## Main Subjects

S L No	Subject	Theory No. of Hours	Practical No. of Hours	Clinical posting	Total No. of Hours
1	Respiratory Technology – Clinical	50	50	250	350
2	Respiratory Technology – Applied	50	50	250	350
3	Respiratory Technology – Advanced	50	50	250	350
	Total	150	150	750	1050

## Subsidiary Subjects

Ethics, Database Management	50 Hours
Research & Biostatistics	20 Hours
Computer application	10 Hours

### 9. Schedule of Examination:

The university shall conduct two examinations annually at an interval of not less than 4 to 6 months as notified by the university from time to time. A candidate who satisfies the requirement of attendance, progress and conduct as stipulated by the university shall be eligible to appear for the university examination. Certificate to that effect shall be produced from the Head of the institution along with the application for examination and the prescribed fee.

### 10. Scheme of Examination:

There shall be three examinations, one each at the end of I, II and III year. The examination for both main and subsidiary subjects for all courses in Allied Health Sciences shall be common in the first year. Distribution of Subjects and marks for First Year, Second year & Third year University theory and practical Examinations are shown in the Table – IV, V & VI.

#### First year examination:

The University examination for 1<sup>st</sup> year shall consist of only theory examination and there shall be no University Practical Examination.

#### Second & Third year examination:

The University examination for 2<sup>nd</sup> and 3<sup>rd</sup> year shall consist of Written Examination & Practical.

#### Written Examinations consists of

04 papers in the 2<sup>nd</sup> Year

03 papers in the 3<sup>rd</sup> Year.

#### Practical examination:

Two practical examinations, at the end 2<sup>nd</sup> Year and one practical examination at the end of the 3<sup>rd</sup> year.

**TABLE-IV**

**Distribution of Subjects and marks for First Year University theory Examination**

A	Main Subjects*	Written Paper		I .A Theory Marks	Total Marks
		Duration	Marks		
1	Basic Anatomy [Including Histology]	3 hours	80	20	100
2	Physiology	3 hours	80	20	100
3	Biochemistry	3 hours	80	20	100
4	Pathology	3hours	80	20	100
5	Microbiology	3 hours	80	20	100

B	Subsidiary Subject**				Total
1	English	3 hours	80	20	100
2	Kannada	3 hours	80	20	100
3	Health Care	3 hours	80	20	100

Note \* I A = Internal Assessment

Main Subjects shall have University Examination.

There Shall be no University Practical Examination.

\*\* Subsidiary subjects : Examination for subsidiary subjects shall be conducted by respective colleges.

**TABLE – V**  
**Distribution of Subjects and marks for Second Year Examination.**

Paper	Subjects	Theory				Practicals			Grand Total
		Theory	Viva-voca	IA	Sub Total	Practicals	I.A.	Sub Total	
I	Section A - Applied Pathology	50	30	20	150	40	10	50	200
	Section B - Applied Microbiology	50							
II	Introduction to Respiratory Technology	100	30	20	150	40	10	50	200
III	Pharmacology	80	--	20	100	No Practicals			100
IV	Medicine relevant to Respiratory technology	80	--	20	100	No Practicals			100

**Distribution of Subsidiary Subjects and marks for First Year University theory Examination**

B	Subsidiary Subject**	Duration	Marks	I .A Theory Marks	Total Marks
1	Sociology	3 hours	80	20	100
2	Constitution of India	3 hours	80	20	100
3	Environmental Science & Health	3 hours	80	20	100

\*\* Subsidiary subjects : Examination for subsidiary subjects shall be conducted by respective colleges

TABLE – VI  
**Distribution of Subjects and marks for Third Year Examination.**

Paper	Subjects	Theory				Practicals **			Grand Total
		Theory	Viva-voca	IA	Sub Total	Practicals	I.A.	Sub Total	
I	Respiratory Technology – Clinical	100	30	20	150	120 (40+40+40)	30  (10+10+10)	150	600
II	Respiratory Technology – Applied	100	30	20	150				
IV	Respiratory Technology – Advanced	100	30	20	150				

\*\* Practicals-One common practical for all the three papers with equal weight age of marks  
i.e. 40 practical mark and 10 I.A. marks for each paper.

**Distribution of Subsidiary Subjects and marks for First Year University theory Examination**

B	Subsidiary Subject**	Duration	Marks	I .A Theory Marks	Total Marks
1	Ethics, Database Management	3 hours	80	20	100
2	Research & Biostatistics	3 hours	80	20	100
3	Computer application	3 hours	80	20	100

\*\* Subsidiary subjects : Examination for subsidiary subjects shall be conducted by respective colleges

11. Pass criteria

11.1. First year examination.

- a. Main Subjects: A candidate is declared to have passed in a subject, if he/she secures, 50% of marks in University Theory exam and internal assessment added together.
- b. Subsidiary Subjects: The minimum prescribed marks for a pass in subsidiary subject shall be 35% of the maximum marks prescribed for a subject. The marks obtained in the subsidiary subjects shall be communicated to the University before the Commencement of the University examination.

## 11.2. Second and Third year Examination

a. Main Subjects: A candidate is declared to have passed the Examination in a subject if he/she secures 50% of the marks in theory and 50% in practical separately. For a pass in theory, a candidate has to secure a minimum of 40% marks in the University conducted written examination, and 50% in aggregate in the University conducted written examination, internal assessment and Viva-Voce added together and for pass in Practical, a candidate has to secure a minimum of 40% marks in the university conducted Practical/Clinical examination and 50% in aggregate i.e. University conducted Practical/Clinical and Internal Assessment.

In the third year a candidate is declared to have passed only if he/she passes all the three theory papers and one practical examination in a single attempt failing which where in the candidate fails in one or more theory papers and or practical examination he/she will have to re appear for all the 3 theory papers and the practical examination in the subsequent attempt.

b. Subsidiary Subjects: The minimum prescribed marks for a pass in subsidiary subject shall be 35% of the maximum marks prescribed for a subject. The marks obtained in the subsidiary subjects shall be communicated to the University before the commencement of the University examination.

## 12. Carry over benefit

### 12.1 First year examination:

A candidate who fails in any two of the five main subjects of first year shall be permitted to carry over those subjects to second year. However, he/se must pass the carry over subjects before appearing for second year examination; otherwise he/she shall not permitted to proceed to third year.

### 12.2. Second year examination.

A candidate is permitted to carry over any one main subject to the third year but shall pass this subject before appearing for the third year examination

## 13. Declaration Of Class

- a. A candidate having appeared in all the subjects in the same examination and passed that examination in the first attempt and secures 75% of marks or more of grand total marks prescribed will be declared to have passed the examination with Distinction.
- b. A candidate having appeared in all subjects in the same examination and passed that examination in the first attempt and secures 60% of marks or more but less than 75% of grand total marks prescribed will be declared to have passed the examination in First Class.

- c. A candidate having appeared in all the subjects in the same examination and passed that examination in the first attempt and secures 50% of marks or more but less than 60% of grand total marks prescribed will be declared to have passed the examination in Second Class.
- d. A candidate passing the university examination in more than one attempt shall be placed in Pass class irrespective of the percentage of marks secured by him/her in the examination.
- e. The marks obtained by a candidate in the subsidiary subjects shall not be considered for award of Class or Rank.

[Please note fraction of marks should not be rounded off clauses (a), (b) and (c)]

#### 14. Eligibility for the award of Degree:

A candidate shall have passed in all the subjects of first, second and third year to be eligible for award of degree.

#### 15. Distribution of Type of Questions and Marks for Various Subjects

##### **THEORY**

SUBJECTS HAVING MAXIMUM MARKS = 100		
TYPE OF QUESTION	NUMBER OF QUESTIONS	MARKS FOR EACH QUESTION
ESSAY TYPE	3 (2x10)	10
SHORT ESSAY TYPE	12 (10 × 5 )	5
SHORT ANSWER TYPE	12 (10 × 3)	3

SUBJECTS HAVING MAXIMUM MARKS = 80		
TYPE OF QUESTION	NUMBER OF QUESTIONS	MARKS FOR EACH QUESTION
ESSAY TYPE	3 (2x10)	10
SHORT ESSAY TYPE	8 (6 × 5)	5
SHORT ANSWER TYPE	12(10 × 3)	3

SUBJECTS HAVING MAXIMUM MARKS = 60		
TYPE OF QUESTION	NUMBER OF QUESTIONS	MARKS FOR EACH QUESTION
ESSAY TYPE	3 (2x10)	10
SHORT ESSAY TYPE	7(5×5)	5
SHORT ANSWER TYPE	7(5×3)	3

SUBJECTS HAVING MAXIMUM MARKS = 50		
TYPE OF QUESTION	NUMBER OF QUESTIONS	MARKS FOR EACH QUESTION
ESSAY TYPE	3 (2x10)	10
SHORT ESSAY TYPE	5(3×5)	5
SHORT ANSWER TYPE	7(5×3)	3

**Syllabus for First year Allied Health science courses RGUHS**  
**B.Sc Respiratory Care Technology**

**ANATOMY**

No. of theory classes: 70 hours

No. of practical classes : 20 hours

Introduction: human body as a whole

Theory:

Definition of anatomy and its divisions

Terms of location, positions and planes

Cell and its organelles

Epithelium-definition, classification, describe with examples, function

Glands- classification, describe serous & mucous glands with examples

Basic tissues – classification with examples

Practical: Histology of types of epithelium

Histology of serous, mucous & mixed salivary gland

Locomotion and support

Theory:

Cartilage – types with example & histology

Bone – Classification, names of bone cells, parts of long bone, microscopy of compact bone, names of all bones, vertebral column, intervertebral disc, fontanelles of fetal skull

Joints – Classification of joints with examples, synovial joint (in detail for radiology)

Muscular system: Classification of muscular tissue & histology

Names of muscles of the body

Practical: Histology of the 3 types of cartilage

Demo of all bones showing parts, radiographs of normal bones & joints

Histology of compact bone (TS & LS)

Demonstration of all muscles of the body

Histology of skeletal (TS & LS), smooth & cardiac muscle

3. Cardiovascular system

Theory:

Heart-size, location, chambers, exterior & interior

Blood supply of heart

Systemic & pulmonary circulation

Branches of aorta, common carotid artery, subclavian artery, axillary artery, brachial artery, superficial palmar arch, femoral artery, internal iliac artery

Peripheral pulse

Inferior venacava, portal vein, portosystemic anastomosis

Great saphenous vein

Dural venous sinuses

Lymphatic system- cisterna chyli & thoracic duct

Histology of lymphatic tissues

Names of regional lymphatics, axillary and inguinal lymph nodes in brief

Practical:

Demonstration of heart and vessels in the body

Histology of large artery, medium sized artery & vein, large vein

Microscopic appearance of large artery, medium sized artery & vein, large vein pericardium

Histology of lymph node, spleen, tonsil & thymus

Normal chest radiograph showing heart shadows

Normal angiograms

4. Gastro-intestinal system

Theory:

Parts of GIT, Oral cavity (lip, tongue (with histology), tonsil, dentition, pharynx, salivary glands, Waldeyer's ring)

Oesophagus, stomach, small and large intestine, liver, gall bladder, pancreas

Radiographs of abdomen

5. Respiratory system

Parts of RS, nose, nasal cavity, larynx, trachea, lungs, bronchopulmonary segments

Histology of trachea, lung and pleura

Names of paranasal air sinuses

Practical: Demonstration of parts of respiratory system.

Normal radiographs of chest

Histology of lung and trachea

6. Peritoneum

Theory: Description in brief

Practical: Demonstration of reflections

7. Urinary system

Kidney, ureter, urinary bladder, male and female urethra

Histology of kidney, ureter and urinary bladder

Practical: demonstration of parts of urinary system

Histology of kidney, ureter, urinary bladder

Radiographs of abdomen-IVP, retrograde cystogram

8. Reproductive system

Theory:

Parts of male reproductive system, testis, vas deferens, epididymis, prostate (gross & histology)

Parts of female reproductive system, uterus, fallopian tubes, ovary (gross & histology)

Mammary gland – gross

Practical: demonstration of section of male and female pelvis with organs in situ

Histology of testis, vas deferens, epididymis, prostate, uterus, fallopian tubes, ovary

Radiographs of pelvis – hysterosalpingogram

## 9. Endocrine glands

### Theory:

Names of all endocrine glands in detail on pituitary gland, thyroid gland, parathyroid gland, suprarenal gland – (gross & histology)

Practical: Demonstration of the glands  
Histology of pituitary, thyroid, parathyroid, suprarenal glands

## 10. Nervous system

### Theory:

Neuron

Classification of NS

Cerebrum, cerebellum, midbrain, pons, medulla oblongata, spinal cord with spinal nerve (gross & histology)

Meninges, Ventricles & cerebrospinal fluid

Names of basal nuclei

Blood supply of brain

Cranial nerves

Sympathetic trunk & names of parasympathetic ganglia

Practical: Histology of peripheral nerve & optic nerve  
Demonstration of all plexuses and nerves in the body  
Demonstration of all part of brain  
Histology of cerebrum, cerebellum, spinal cord

### Sensory organs:

#### Theory:

Skin: Skin-histology

Appendages of skin

Eye: parts of eye & lacrimal apparatus

Extra-ocular muscles & nerve supply

Ear: parts of ear- external, middle and inner ear and contents

Practical: Histology of thin and thick skin  
Demonstration and histology of eyeball  
Histology of cornea & retina

### Embryology

#### Theory:

Spermatogenesis & oogenesis

Ovulation, fertilization

Fetal circulation

Placenta

#### Internal Assessment

Theory - Average of two exams conducted. 20

Practicals: Record & Lab work\* 10

\* There shall be no University Practical Examination and internal assessment marks secured in Practicals need not be sent to the University.

### **Scheme of Examination Theory**

There shall be one theory paper of three hours duration carrying 80 marks. Distribution of type of questions and marks for Anatomy shall be as given under.

Type of Questions	No. of Questions	Marks	Sub-total
Long Essay (LE)	3 (To Attempt 2)	2 x 10	20
Short Essay (SE)	8 (To attempt 6)	6 x 5	30
Short Answer (SA)	12 (To Attempt 10)	10 x 3	30
Total Marks			80

NO PRACTICAL EXAMINATION

### REFERENCE BOOKS

#### Anatomy

1. William Davis (P) understanding Human Anatomy and Physiology MC Graw Hill
2. Chaurasia –A Text book of Anatomy  
T.S. Ranganathan – A text book of Human Anatomy
3. Fattana, Human anatomy  
(Description and applied)  
Saunders & C P Prism Publishers, Bangalore – 1991
4. ESTER . M. Grishcimer,  
Physiology & Anatomy with Practical Considerations, J.P. Lippin Cott. Philadelphia
5. Essential of Human embryology, Bhatnagar revised edition, Orient Longman PVT Ltd

# Syllabus for First year Allied Health science courses **RGUHS**

## **B.Sc Respiratory Care Technology**

### **PHYSIOLOGY**

Theory 70 hours

Practical 20hours

Introduction – composition and function of blood

Red blood cells – Erythropoiesis , stages of differentiation function , count physiological Variation.

Haemoglobin –structure , functions , concentration physiological variation

Methods of Estimation of Hb

White blood cells – Production , function, life span, count, differential count

Platelets – Origin, normal count, morphology functions.

Plasma Proteins – Production, concentration , types, albumin, globulin, Fibrinogen, Prothrombin functions.

Haemostasis & Blood coagulation

Haemostasis – Definition, normal haemostasis, clotting factors, mechanism of clotting, disorders of clotting factors.

Blood Bank

Blood groups – ABO system, Rh system

Blood grouping & typing

Crossmatching

Rh system – Rh factor, Rh in compatibility.

Blood transfusion – Indication, universal donor and recipient concept.

Selection criteria of a blood donor. transfusion reactions Anticoagulants – Classification, examples and uses

Anaemias : Classification – morphological and etiological. effects of anemia on body

Blood indices – Colour index , MCH, MCV, MCHC

Erythrocyte sedimentation Rate (ESR) and Packed cell volume

Normal values, Definition . determination,

Blood Volume -Normal value ,determination of blood volume and regulation of blood volume

Body fluid – pH, normal value, regulation and variation

Lymph – lymphoid tissue formation, circulation, composition and function of lymph

#### Cardiovascular system

Heart – Physiological Anatomy, Nerve supply

Properties of Cardiac muscle,

Cardiac cycle-systole,diastole. Intraventricular pressure curves.

Cardiac Output – only definition

Heart sounds Normal heart sounds Areas of auscultation.

Blood Pressure – Definition, normal value, clinical measurement of blood pressure.

Physiological variations, regulation of heart rate, cardiac shock, hypotension, hypertension.

Pulse – Jugular, radial pulse, Triple response

Heart sounds – Normal heart sounds, cause characteristics and signification. Heart rate

Electrocardiogram (ECG) –significance.

Digestive System - Physiological anatomy of Gastro intestinal tract, Functions of digestive system

Salivary glands Structure and functions. Deglutination –stages and regulation  
Stomach – structure and functions  
Gastric secretion – Composition function regulation of gastric juice secretion  
Pancrease – structure, function, composition, regulation of pancreatic juice  
Liver – functions of liver  
Bile secretion, composition, function regulation of bile secretion .Bilirubin metabolism types of bilirubin, Vandernberg reaction, Jaundice- types, significance.  
Gall bladder – functions  
Intestine – small intestine and large intestine  
Small intestine –Functions- Digestive, absorption ,movements.  
Large intestine – Functions, Digestion and absorption of Carbohydrates,Proteins, Fats,Lipids.Defecation  
Respiratory system  
    Functions of Respiratory system, Physiological Anatomy of Respiratory system, Respiratory tract, Respiratory Muscles, Respiratory organ-lungs, Alveoli, Respiratory membrane, stages of respiration.  
Mechanism of normal and rigorous respiration. Forces opposing and favouring expansion of the lungs. Intra pulmonary pleural pressure, surface tension, recoil tendency of the wall. H  
Transportation of Respiratory gases :  
Transportation of Oxygen : Direction, pressure gradient, Forms of transportation, Oxygenation of Hb. Quantity of Oxygen transported.

Lung volumes and capacities  
Regulation of respiration what? Why? How? Mechanisms of Regulation, nervous and chemical regulation. Respiratory centre. Hearing Brier, Reflexes.  
Applied Physiology and Respiration : Hypoxia, Cyanosis, Asphyxia, Dyspnea, Dysbarism, Artificial Respiration, Apnoea.  
Endocrine System - Definition Classification of Endocrine glands & their Harmones  
Properties of Harmones .  
Thyroid gland hormone – Physiological, Anatomy, Hormone scerated, Physiological function, regulation of secretion. Disorders – hypo and hyper secretion of hormone  
Adrenal gland, Adrenal cortex physiologic anatomy of adrenal gland,  
Adrenal cortex, cortical hormones – functions and regulation  
Adrenal medulla – Hormones , regulation and secretion. Functions of Adrenaline and nor adrenaline  
Pituitary hormones – Anterior and posterior pituitary hormones, secretion ,function  
Pancreas – Hormones of pancreas  
Insulin – secretion, regulation ,function and action  
Diabetes mellitus – Regulation of blood glucose level  
Parathyroid gland – function, action ,regulation of secretion of parathyroid hormone.  
Calcitonin – function and action  
Special senses  
Vision – structure of eye. Function of different parts.  
Structure of retina  
Hearing structure and function of can mechanism of hearing  
Taste – Taste buds functions . Smell physiology, Receptors.  
Nervous system

Functions of Nervous system, Neurone structure, classification and properties. Neuroglia, nerve fiber, classification, conduction of impulses continuous and saltatory. Velocity of impulse transmission and factors affecting. Synapse – structure, types, properties. Receptors – Definition, classification, properties. Reflex action – unconditioned properties of reflex action. Babinski's sign. Spinal cord nerve tracts. Ascending tracts, Descending tracts –

pyramidal tracts – Extrapyramidal tracts. Functions of Medulla, pons, Hypothalamic disorders. Cerebral cortex lobes and functions, Sensory cortex, Motor cortex, Cerebellum functions of Cerebellum. Basal ganglion-functions. EEG.

Cerebro Spinal Fluid (CSF) : formation, circulation, properties, composition and functions lumbar puncture.

Autonomic Nervous System : Sympathetic and parasympathetic distribution and functions and comparison of functions.

Excretory System

Excretory organs

Kidneys: Functions of kidneys structural and functional unit nephron, vasorecta, cortical and juxtamedullary nephrons – Comparison, Juxta Glomerular Apparatus – Structure and function. Renal circulation peculiarities.

Mechanism of Urine formation : Ultrafiltration criteria for filtration GFR, Plasma fraction, EFP, factors effecting EFR. Determination of GFR selective reabsorption – sites of reabsorption, substance reabsorbed, mechanisms of reabsorption Glucose, urea.

H + Cl aminoacids etc. TMG, Tubular load, Renal threshold % of reabsorption of different substances, selective secretion.

Properties and composition of normal urine, urine output. Abnormal constituents in urine, Mechanism of urine concentration.

Counter – Current Mechanisms : Micturition, Innervation of Bladder, Cystourethrogram.

Diuretics : Water, Diuretics, osmotic diuretics, Artificial kidney Renal function tests – plasma clearance Actions of ADH, Aldosterone and PTH on kidneys. Renal function tests

Reproductive system

Function of Reproductive system, Puberty, male reproductive system. Functions of testes, spermatogenesis site, stages, factors influencing semen. Endocrine functions of testes Androgens – Testosterone structure and functions. Female reproductive system. Ovulation, menstrual cycle. Physiological changes during pregnancy, pregnancy test. Lactation : Composition of milk factors controlling lactation.

Muscle nerve physiology

Classification of muscle, structure of skeletal muscle, Sarcomere contractile proteins, Neuromuscular junction. Transmission across, Neuromuscular junction. Excitation contraction coupling. Mechanism of muscle contraction muscle tone, fatigue Rigour mortis

Skin -structure and function

Body temperature measurement, Physiological variation, Regulation of body Temperature by physical chemical and nervous mechanisms. Role of Hypothalamus, Hypothermia and fever.

Practicals

Haemoglobinometry

White Blood Cell count

Red Blood Cell count

Determination of Blood Groups

Leishman's staining and Differential WBC count  
 Determination of packed cell Volume  
 Erythrocyte sedimentation rate [ESR]  
 Calculation of Blood indices  
 Determination of Clotting Time, Bleeding Time  
 Blood pressure Recording  
 Auscultation for Heart Sounds  
 Artificial Respiration  
 Determination of vital capacity  
 Internal Assessment

Theory - Average of two exams conducted. 20  
 Practicals: Record & Lab work\* 10

\* There shall be no University Practical Examination and internal assessment marks secured in Practicals need not be sent to the University.

### **Scheme of Examination Theory**

There shall be one theory paper of three hours duration carrying 80 marks. Distribution of type of questions and marks for Physiology shall be as given under.

Type of Questions	No. of Questions	Marks	Sub-total
Long Essay (LE)	3 (To Attempt 2)	2 x 10	20
Short Essay (SE)	8 (To attempt 6)	6 x 5	30
Short Answer (SA)	12 (To Attempt 10)	10 x 3	30
Total Marks			80

### **NO PRACTICAL EXAMINATION**

## **B.Sc Respiratory Care Technology**

### **BIOCHEMISTRY**

No. Theory classes : 70hours

No. of practical classes : 20 hours

Theory:

Specimen collection : Pre-analytical variables

Collection of blood

Collection of CSF & other fluids

Urine collection

Use of preservatives

Anticoagulants

Introduction to Laboratory apparatus

Pipettes- different types (Graduated, volumetric, Pasteur, Automatic etc.,)

Calibration of glass pipettes

Burettes, Beakers, Petri dishes, depression plates.

Flasks - different types )Volumetric, round bottmed, Erlemeyer conical etc.,)

Funnels – different types (Conical, Buchner etx.,)

Bottles – Reagent bottles – graduated and common, Wash bottles – different type

Specimen bottles etc.,

Measuring cylinders, Porcelain dish

Tubes – Test tubes, centrifuge tubes, test tube draining rack

Tripod stand, Wire gauze, Bunsen burner.

Cuvettes, significance of cuvettes in colorimeter, cuvettes for visible and UV range, cuvette

holders Racks – Bottle, Test tube, Pipette

Dessicator, Stop watch, rimers, scissors

Dispensers – reagent and sample

Any other apparatus which is important and may have been missed should also be covered

Maintenance of lab glass ware and apparatus:

Glass and plastic ware in Laboratory

\*use of glass: significance of boro silicate glass ; care and cleaning  
of glass ware, different cleaning solutions of glass

\* care and cleaning of plastic ware, different cleaning solutions

3. Instruments (Theory and demonstration) Diagrams to be drawn

Water bath: Use, care and maintenance

Oven & Incubators : Use, care and maintenance.

Water Distilation plant and water deionisers. Use, care and maintenance

Refrigerators, cold box, deep freezers – Use, care and maintainance

Reflux condenser : Use, care and maintenance

Centrifuges (Theory and demonstration) Diagrams to be drawn

Definition, Principle, svedberg unit, centrifugal force, centrifugal field rpm,  
ref.Conversion of G to rpm and vice versa.

Different types of centrifuges

Use care and maintenance of a centrifuge

Laboratory balances [Theory & Practicals) Diagrams to be drawn

Manual balances: Single pan, double pan, trip balance

Direct read out electrical balances.

Use care and maintenance. Guideline to be followed and precautions to be taken while Weighing. Weighing different types of chemicals, liquids. Hygroscopic compounds etc. Colorimeter and spectrophotometer (Theory and Practicals) Diagrams to be drawn Principle, Parts Diagram. Use, care and maintenance.

pH meter (Theory & practicals) Diagrams to be drawn principle, parts, Types of electrodes, salt bridge solution.

Use, care and maintenance of Ph meter and electrodes

Guidelines to be followed and precautions to be taken while using pH meter

4. Safety of measurements

5. Conventional and SI units

6. Atomic structure

Dalton's theory, Properties of electrons, protons, neutrons, and nucleus, Rutherford's model of atomic structure, Bohr's model of atomic structure, orbit and orbital, Quantum numbers, Heisenberg's uncertainty principle.

Electronic configuration – Aufbau principle, Pauli's exclusion principle, etc.,

Valency and bonds – different types of strong and weak bonds in detail with examples

Theory & Practicals for all the following under this section

Molecular weight, equivalent weight of elements and compounds, normality molarity

Preparation of molar solutions (mole/litre solution) eg: 1 M NaCl, 0.15 M NaCl

1 M NaOH, 0.1 M HCl, 0.1 M H<sub>2</sub>SO<sub>4</sub> etc.,

preparation of normal solutions. eg., 1N Na<sub>2</sub>CO<sub>3</sub>, 0.1N Oxalic acid, 0.1 N HCl, 0.1N H<sub>2</sub>SO<sub>4</sub>, 0.66 N H<sub>2</sub>SO<sub>4</sub> etc.,

Percent solutions. Preparation of different solutions – v/v w/v (solids, liquids and acids)

Conversion of a percent solution into a molar solution

Dilutions

Diluting solutions: eg. Preparation of 0.1 N NaCl from 1 N NaCl from 2 N HCl etc., Preparing working standard from stock standard, Body fluid dilutions, Reagent dilution techniques, calculating the dilution of a solution, body fluid reagent etc.,

Saturated and supersaturated solutions.

Standard solutions. Technique for preparation of standard solutions eg: Glucose, urea, etc.,

Significance of volumetric flask in preparing standard solutions. Volumetric flasks of different sizes, Preparation of standard solutions of deliquescent compounds (CaCl<sub>2</sub>, potassium carbonate, sodium hydroxide etc.,)

Preparation of standards using conventional and SI units

Acids, bases, salts and indicators.

Acids and Bases: Definition, physical and chemical properties with examples.

Arrhenius concept of acids and bases, Lowry – Bronsted theory of acids and bases classification of acids and bases. Different between bases and alkali, acidity and basicity, monoprotic and polyprotic acids and bases

Concepts of acid base reaction, hydrogen ion concentration, Ionisation of water, buffer, Ph value of a solution, preparation of buffer solutions using Ph meter.

Salts: Definition, classification, water of crystallization – definition and different types, deliquescent and hygroscopic salts

Acid- base indicators: (Theory and Practicals)

Theory – Definition, concept, mechanism of dissociation of an indicator, colour change of an indicator in acidic and basic conditions, use of standard buffer solution and indicators for pH determinations, preparation and its application, list of commonly used indicators and their pH range, suitable pH indicators used in different titrations, universal indicators

Practicals – Titration of a simple acid and a base (Preparation of standard solution of oxalic acid and using this solution finding out the normality of a sodium hydroxide solution. Acid to be titrated using this base) Calculation of normality of an acid or a base after titration, measurement of hydrogen ion concentration

Quality control : Accuracy  
Precision  
Specificity  
Sensitivity  
Limits of error allowable in laboratory  
Percentage error

Normal values and Interpretations

Special Investigations : Serum Electrophoresis  
Immunoglobulins  
Drugs : Digitoxin, Theophyllines

Regulation of Acid Base status:

Henderson Hasselback Equations  
Buffers of the fluid

pH Regulation

Disturbance in acid Base Balance

Anion Gap

Metabolic acidosis

Metabolic acidosis

Metabolic alkalosis

Respiratory acidosis

Respiratory alkalosis

Basic Principles and estimation of Blood Gases and pH

Basic principles and estimation of Electrolytes

Water Balance

Sodium regulation

Bicarbonate buffers

Nutrition, Nutritional support with special emphasis on parental nutrition.

Calorific Value

Nitrogen Balance

Respiratory Quotient

Basal metabolic rate

Dietary Fibers

Nutritional importance of lipids, carbohydrates and proteins

Vitamins

## PRACTICALS

Analysis of Normal Urine

Composition of urine

Procedure for routine screening

Urinary screening for inborn errors of metabolism  
Common renal disease  
Urinary calculus

Urine examination for detection of abnormal constituents  
Interpretation and Diagnosis through charts  
Liver Function tests  
Lipid Profile  
Renal Function test  
Cardiac markers  
Blood gas and Electrolytes

4. Estimation of Blood sugar, Blood Urea and electrolytes  
5. Demonstration of Strips  
Demonstration of Glucometer

Internal Assessment

Theory - Average of two exams conducted. 20  
Practicals: Record & Lab work\* 10

\* There shall be no University Practical Examination and internal assessment marks secured in  
Practicals need not be sent to the University.

### **Scheme of Examination Theory**

There shall be one theory paper of three hours duration carrying 80 marks. Distribution of type of questions and marks for Biochemistry shall be as given under.

Type of Questions	No. of Questions	Marks	Sub-total
Long Essay (LE)	3 (To Attempt 2)	2 x 10	20
Short Essay (SE)	8 (To attempt 6)	6 x 5	30
Short Answer (SA)	12 (To Attempt 10)	10 x 3	30
Total Marks			80

### **NO PRACTICAL EXAMINATION**

#### REFERENCE BOOKS

##### **Biochemistry**

1. Varley – Clinical chemistry
2. TEITZ – Clinical chemistry
3. Kaplan – Clinical chemistry
4. Ramakrishna(S) Prasanna(KG), Rajna ® Text book of Medical Biochemistry Latest Ed Orient longman Bombay –1980
5. Vasudevan (DM) Sreekumari(S) Text book of Biochemistry for Medical students ,Latest Ed
6. DAS(Debajyothi) Biochemistry Latest ED Academic, Publishers, Calcutta – 1992
7. Text Book of Medical Biochemistry – 3<sup>rd</sup> Edition, Orient Longman PVT Ltd
8. Practical Biochemistry for Medical Students – Rajagopal, Orient Longman PVT Ltd

# **Syllabus for First year Allied Health science courses RGUHS**

## **B.Sc Respiratory Care Technology**

### **PATHOLOGY**

Histo Pathology ,Clinical Pathology, Haematology and Blood Banking

Theory – 70 hours

Practical – 20 hours

HistoPathology - Theory

- Introduction to Histo Pathology
- Receiving of Specimen in the laboratory
- Grossing Techniques
- Mounting Techniques – various Mountants
- Maintenance of records and filing of the slides.
- Use & care of Microscope
- Various Fixatives, Mode of action, Preparation and Indication.
- Bio-Medical waste management
  - Section Cutting
  - Tissue processing for routine paraffin sections
  - Decalcification of Tissues.
  - Staining of tissues - H& E Staining
- Bio-Medical waste management

Clinical Pathology – Theory

- Introduction to Clinical Pathology
- Collection, Transport, Preservation, and Processing of various clinical specimens
- Urine Examination – Collection and Preservation of urine.

Physical, chemical, Microscopic Examination

- Examination of body fluids.
- Examination of cerebro spinal fluid (CSF)
- Sputum Examination.
- Examination of feces

Haematology – Theory

- Introduction to Haematology
- Normal constituents of Blood, their structure and function.
- Collection of Blood samples
- Various Anticoagulants used in Haematology
- Various instruments and glassware used in Haematology, Preparation and use of glassware
- Laboratory safety guidelines
- SI units and conventional units in Hospital Laboratory
- Hb,PCV
- ESR
- Normal Haemostasis

Bleeding Time, Clotting Time, Prothrombin Time, Activated Partial Thromboplastin Time.

Blood Bank  
 Introduction  
 Blood grouping and Rh Types  
 Cross matching

**PRACTICALS**

- Urine Examination.
  - Physical
  - Chemical
  - Microscopic
  - Blood Grouping Rh typing.
  - Hb Estimation, Packed Cell Volume[PCV], Erythrocyte Sedimentation rate{ESR}
  - Bleeding Time, Clotting Time.
- Histopathology – Section cutting and H &E Staining.[For BSc MLT only ]

**Internal Assessment**

Theory - Average of two exams conducted. 20

Practicals: Record & Lab work\* 10

\* There shall be no University Practical Examination and internal assessment marks secured in Practicals need not be sent to the University.

**Scheme of Examination Theory**

There shall be one theory paper of three hours duration carrying 80 marks. Distribution of type of questions and marks for Pathology shall be as given under.

Type of Questions	No. of Questions	Marks	Sub-total
Long Essay (LE)	3 (To Attempt 2)	2 x 10	20
Short Essay (SE)	8 (To attempt 6)	6 x 5	30
Short Answer (SA)	12 (To Attempt 10)	10 x 3	30
Total Marks			80

**NO PRACTICAL EXAMINATION**

**REFERENCE BOOKS**

**Pathology –**

1. Culling Histopathology techniques
2. Bancroft Histopathology techniques
3. Koss – cytology
4. Winifred greg – Diagnostic cytopathology
5. Orell – Cyto Pathology
6. Todd & Sanford Clinical Diagnosis by laboratory method
7. Dacie & Lewis – Practical Haematology
8. Ramanic Sood, Laboratory Technology (Methods and interpretation) 4<sup>th</sup> Ed.  
 J.P. Bros, New Delhi –1996)

 J.P. Bros, New Delhi – 1998
10. Sachdev K.N. Clinical Pathology and Bacteriology 8<sup>th</sup> Ed, J.P. Bros,  
 New Delhi-1991.
11. Krishna - Text book of Pathology, Orient Longman PVT Ltd.

# Syllabus for First year Allied Health science courses **RGUHS**

## **B.Sc Respiratory Care Technology**

### **Microbiology**

**Objective** : - This course introduces the principles of Microbiology with emphasis on applied aspects of Microbiology of infectious diseases particularly in the following areas

Principles & practice of sterilization methods.

Collection and despatch of specimens for routine microbiological investigations.

Interpretation of commonly done bacteriological and serological investigations.

Control of Hospital infections

Biomedical waste management

Immunization schedule

Theory - 70 hours

1. Morphology 4 hours  
Classification of microorganisms, size, shape and structure of bacteria. Use of microscope in the study of bacteria.
2. Growth and nutrition 4 hours  
Nutrition, growth and multiplications of bacteria, use of culture media in diagnostic bacteriology.
3. Sterilisation and Disinfection 4 hours  
Principles and use of equipments of sterilization namely Hot Air oven, Autoclave and serum inspissator. Pasteurization, Anti septic and disinfectants. Antimicrobial sensitivity test
4. Immunology 6 hours  
Immunity Vaccines, Types of Vaccine and immunization schedule  
Principles and interpretation of commonly done serological tests namely Widal, VDRL, ASLO, CRP, RF & ELISA. Rapid tests for HIV and HbsAg(Technical details to be avoided)
5. Systematic Bacteriology 20 hours  
Morphology, cultivation, diseases caused ,laboratory diagnosis including specimen collection of the following bacteria( the classification, antigenic structure and pathogenicity are not to be taught)  
Staphylococci, Streptococci, Pneumococci, Gonococci, Meningococci, C diphtheriae, Mycobacteria, Clostridia, Bacillus, Shigella, Salmonella, Esch coli, Klebsiella, Proteus,vibrio cholerae, Pseudomonas & Spirochetes
6. Parasitology 10 hours  
Morphology, life cycle, laboratory diagnosis of following parasites  
E. histolytica, Plasmodium, Tape worms, Intestinal nematodes
7. Mycology 4 hours  
Morphology, diseases caused and lab diagnosis of following fungi.  
Candida, Cryptococcus, Dermatophytes ,opportunistic fungi.
8. Virology 10 hours  
General properties of viruses, diseases caused, lab diagnosis and prevention of following viruses, Herpes, Hepatitis, HIV, Rabies and Poliomyelitis.
9. Hospital infection Causative agents, transmission methods, investigation, prevention and control Hospital infection. 4 hours
10. Principles and practice Biomedical waste management 4 hours

## Practical

20 hours

Compound Microscope.

Demonstration and sterilization of equipments – Hot Air oven, Autoclave, Bacterial filters.

Demonstration of commonly used culture media, Nutrient broth, Nutrient agar, Blood agar, Chocolate agar, Mac conkey medium, LJ media, Robertson Cooked meat media, Potassium tellurite media with growth, Mac with LF & NLF, NA with staph

Antibiotic susceptibility test

Demonstration of common serological tests – Widal, VRDL, ELISA.

Grams stain

Acid Fast staining

Stool exam for Helminthic ova

Visit to hospital for demonstration of Biomedical waste mangement.

Anaerobic culture methods.

### Internal Assessment

Theory - Average of two exams conducted. 20

Practicals: Record & Lab work\* 10

\* There shall be no University Practical Examination and internal assessment marks secured in Practical need not be sent to the University.

### **Scheme of Examination Theory**

There shall be one theory paper of three hours duration carrying 80 marks. Distribution of type of questions and marks for Microbiology shall be as given under.

Type of Questions	No. of Questions	Marks	Sub-total
Long Essay (LE)	3 (To Attempt 2)	2 x 10	20
Short Essay (SE)	8 (To attempt 6)	6 x 5	30
Short Answer (SA)	12 (To Attempt 10)	10 x 3	30
Total Marks			80

9. Introduction to Medical Microbiology –Anathanarayana, Orient Longman PVT Ltd.

**Syllabus for First year Allied Health science courses RGUHS**  
**B.Sc Respiratory Care Technology**  
**SUBSIDIARY SUBJECTS**  
**SOCIOLOGY**

Teaching Hours : 20

Course Description

This course will introduce student to the basic sociology concepts, principles and social process, social institutions [in relation to the individual, family and community and the various social factors affecting the family in rural and urban communities in India will be studied.

Introduction :

Meaning – Definition and scope of sociology

Its relation to Anthropology, Psychology, Social Psychology

Methods of Sociological investigations – Case study, social survey, questionnaire, interview and opinion poll methods.

Importance of its study with special reference to health care professionals

Social Factors in Health and Disease:

Meaning of social factors

Role of social factors in health and disease

Socialization :

Meaning and nature of socialization

Primary, Secondary and Anticipatory socialization

Agencies of socialization

Social Groups:

1. Concepts of social groups, influence of formal and informal groups on health and sickness.

The role of primary groups and secondary groups in the hospital and rehabilitation setup.

Family :

The family, meaning and definitions

**Functions** of types of family

Changing family patterns

Influence of family on **individual's** health, family and nutrition, the effects of sickness in the family and psychosomatic disease and their **importance** to physiotherapy

Community :

Rural community: Meaning and features – Health hazards to rural communities, health hazards to tribal community.

Urban community – Meaning and features – Health hazards of urbanities

Culture and Health :

Concept of Health

Concept of culture

Culture and Health

Culture and Health Disorders

Social Change :  
Meaning of social changes  
Factors of social changes  
Human adaptation and social change  
Social change and stress  
Social change and deviance  
Social change and health programme  
The role of social planning in the improvement of health and rehabilitation

Social Problems of disabled :  
Consequences of the following social problems in relation to sickness and disability remedies to prevent these problems  
Population explosion  
Poverty and unemployment  
Beggary  
Juvenile delinquency  
Prostitution  
Alcoholism  
Problems of women in employment

Social Security :  
Social Security and social legislation in relation to the disabled

Social Work :  
Meaning of Social Work  
The role of a Medical Social Worker

## ENGLISH

### COURSE OUTLINE

COURSE DESCRIPTION: This course is designed to help the student acquire a good command and comprehension of the English language through individual papers and conferences.

#### BEHAVIOURAL OBJECTIVES :

The student at the end of training is able to

1. Read and comprehend english language
2. Speak and write grammatically correct english
3. Appreciates the value of English literature in personal and professional life.

#### UNIT - I : INTRODUCTION :

Study Techniques  
Organisation of effective note taking and logical processes of analysis and synthesis  
Use of the dictionary  
Enlargement of vocabulary  
Effective diction

UNIT - II : APPLIED GRAMMAR :  
Correct usage  
The structure of sentences  
The structure of paragraphs  
Enlargements of Vocabulary

UNIT - III : WRITTEN COMPOSITION :  
Precise writing and summarising  
Writing of bibliography  
Enlargement of Vocabulary

UNIT - IV : READING AND COMPREHENSION :  
Review of selected materials and express oneself in one's words. Enlargement of Vocabulary.

UNIT - V : THE STUDY OF THE VARIOUS FORMS OF COMPOSITION :  
Paragraph, Essay, Letter, Summary, Practice in writing

UNIT - VI : VERBAL COMMUNICATION :  
Discussions and summarization, Debates, Oral reports, use in teaching

Scheme of Examination

Written (Theory): Maximum Marks: –80 marks.

No Practical or Viva voce examination

This is a subsidiary subject, examination to be conducted by respective colleges. Marks required for a pass is 35%

#### REFERENCE

1. English Grammar Collins, Birmingham University, International Language Data Base, Rupa & Co. 1993
2. Wren and Martin - Grammar and Composition, 1989, Chanda & Co, Delhi
3. Letters for all Occasions. A S Myers. Pub - Harper Perennial
4. Spoken English V. Shasikumar and P V Dhanija. Pub. By: Tata Mcgraw Hill, New Delhi
5. Journalism Made Simple D Wainwright
6. Writers Basic Bookself Series, Writers Digest series
7. Interviewing by Joan Clayton Platkon
8. Penguin Book of Interviews.

## BIO STATISTICS

Time Allotted: 20 Hours

### Course Description:

Introduction to basic statistical concepts: methods of statistical analysis; and interpretation of data

### Behavioural Objectives:

Understands statistical terms.

Possesses knowledge and skill in the use of basic statistical and research methodology.

Unit – I : Introduction

Meaning, definition, characteristics of statistics.

Importance of the study of statistics.

Branches of statistics.

Statistics and health science including nursing.

Parameters and estimates.

Descriptive and inferential statistics.

Variables and their types.

Measurement scales

Unit – II : Tabulation of Data

Raw data, the array, frequency distribution.

Basic principles of graphical representation.

Types of diagrams - histograms, frequency polygons, smooth frequency polygon, commulative frequency curve, ogive.

Normal probability curve.

Unit - III : Measure of Central Tendency

Need for measures of central tendency

Definition and calculation of mean - ungrouped and grouped

Meaning, interpretation and calculation of median ungrouped and grouped.

Meaning and calculation of mode.

Comparison of the mean, and mode.

Guidelines for the use of various measures of central tendency.

Unit - IV : Measure of Variability

Need for measure of dispersion.

The range, the average deviation.

The variance and standard deviation.

Calculation of variance and standard deviation ungrouped and grouped.

Properties and uses of variance and SO

Unit -V : Probability and Standard Distributions.

Meaning of probability of standard distribution.

The Binominal distribution.

The normal distribution.

Divergence from normality - skewness, kurtosis.

Unit - VI : Samling Techniques

Need for sampling - Criteria for good samples.

Application of sampling in Community.

Procedures of sampling and sampling designs errors.

Sampling variation and tests of significance.

Unit - VII : Health Indicator  
Importance of health Indicator.  
Indicators of population, morbidity, mortality, health services.  
Calculation of rates and ratios of health.

Recommended Books.

B.K. Mahajan & M. Gupta (1995) Text Book of Preventive & Social Medicine, 2002, 17<sup>th</sup> Edition Jaypee Brothers.

## HEALTH CARE

Teaching Hours : 40

Introduction to Health

Definition of Health, Determinants of Health, Health Indicators of India, Health Team Concept.

National Health Policy

National Health Programmes ( Briefly Objectives and scope)

Population of India and Family welfare programme in India

Introduction to Nursing

What is Nursing ? Nursing principles. Inter-Personnel relationships. Bandaging : Basic turns; Bandaging extremities; Triangular Bandages and their application.

Nursing Position, Bed making, prone, lateral, dorsal, dorsal re-cumbent, Fowler's positions, comfort measures, Aids and rest and sleep.

Lifting And Transporting Patients: Lifting patients up in the bed. Transferring from bed to wheel chair. Transferring from bed to stretcher.

Bed Side Management: Giving and taking Bed pan, Urinal : Observation of stools, urine. Observation of sputum, Understand use and care of catheters, enema giving.

Methods Of Giving Nourishment: Feeding, Tube feeding, drips, transfusion

Care Of Rubber Goods

Recording of body temperature, respiration and pulse,

Simple aseptic technique, sterilization and disinfection.

Surgical Dressing: Observation of dressing procedures

First Aid :

Syllabus as for Certificate Course of Red Cross Society of St. John's Ambulance Brigade.

## INDIAN CONSTITUTION

Prescribed for the First Year students of all degree classes

Unit-I: Meaning of the term 'Constitution' making of the Indian Constitution 1946-1949.

Unit-II: The democratic institutions created by the constitution Bicameral system of Legislature at the Centre and in the States.

Unit-III: Fundamental Rights and Duties their content and significance.

Unit – IV: Directive Principles of States Policies the need to balance Fundamental Rights with Directive Principles.

Unit – V: Special Rights created in the Constitution for: Dalits, Backwards, Women and Children and the Religious and Linguistic Minorities.

Unit-VI: Doctrine of Separation of Powers legislative, Executive and Judicial and their functioning in India.

Unit – VII: The Election Commission and State Public Service commissions.

Unit – VIII: Method of amending the Constitution.

Unit – IX: Enforcing rights through Writs:

Unit – X: Constitution and Sustainable Development in India.

- Books: 1. J.C. Johari: The Constitution of India- A Politico-Legal Study-Sterling Publication, Pvt. Ltd. New Delhi.  
2. J.N . Pandey: Constitution Law of India, Allahbad, Central Law Agency, 1998.  
3. Granville Austin: The Indian Constitution – Corner Stone of a Nation-Oxford, New Delhi, 2000.

## *ENVIRONMENT SCIENCE AND HEALTH*

Introduction to Environment and Health

Sources, health hazards and control of environmental pollution

Water

The concept of safe and wholesome water.

The requirements of sanitary sources of water.

Understanding the methods of purification of water on small scale and large scale.

Various biological standards, including WHO guidelines for third world countries.

Concept and methods for assessing quality of water.

Domestic refuse, sullage, human excreta and sewage their effects on environment and health, methods and issues related to their disposal.

Awareness of standards of housing and the effect of poor housing on health.

Role of arthropods in the causation of diseases, mode of transmission of arthropods borne diseases, methods of control

Recommended Books.

1. Text Book of Environmental Studies for under graduate courses By Erach Bharucha Reprinted in 2006, Orient Longman Private Limited /Universities Press India Pvt. Ltd.
2. English Kannada Encyclopedia Dictionary, Orient Longman PVT Ltd.

## BASICS IN COMPUTER APPLICATIONS

The course enables the students to understand the fundamentals of computer and its applications.

Introduction to Data processing :

Features of computers, Advantages of using computers. Getting data into / out of computers. Role of computers. What is Data processing? Application areas of computers involved in Data processing. Common activities in processing. Types of Data processing, Characteristics of information. What are Hardware and Software?

Hardware Concepts :

Architecture of computers, Classification of computers, Concept of damage. Types of storage devices. Characteristics of disks, tapes, Terminals, Printers, Network. Applications of networking concept of PC System care, Floppy care, Data care.

Concept of Software.

Classification of software : System software. Application of software. Operating system. Computer system. Computer virus. Precautions against viruses. Dealing with viruses. Computers in medical electronics

Basic Anatomy of Computers

Principles of programming

Computer application - principles in scientific research ; work processing, medicine, libraries, museum , education, information system.

Data processing

Computers in physical therapy - principles in EMG, Exercise testing equipment, Laser.

Scheme of Examination for *MEDICAL ELECTRONICS including COMPUTER APPLICATIONS*

One Written (Theory) paper: Maximum Marks: –80 marks.

No Practical or Viva voce examination

**Syllabus for Second year Allied Health science courses   RGUHS**  
**B.Sc Respiratory Care Technology**  
**APPLIED PHARMACOLOGY**

- General concepts about pharmacodynamic and Pharmacokinetic Principles involved in drug activity.

**I.     Autonomic nerves system.**

- Anatomy & functional organisation.
- List of drugs acting on ANS including dose, route of administration, indications, contra indications and adverse effects.

**II.    Cardiovascular drugs- Enumerate the mode of action, side effects And therapeutic uses of the following drugs.**

- a. Antihypertensives
  - Beta Adrenergic antagonists
  - Alpha Adrenergic antagonists
  - Peripheral Vasodilators
  - Calcium channel blockers
- b. Antiarrhythmic drugs
- c. Cardiac glycosides
- d. Sympathetic and nonsympathetic inotropic agents.
- e. Coronary vasodilators.
- f. Antianginal and anti failure agents
- g. Lipid lowering & anti atherosclerotic drugs.
- h. Drugs used in Haemostasis – anticoagulants Thrombolytics and antithrombolytics.
- i. Cardioplegic drugs- History, Principles and types of cardioplegia.
- j. Primary solutions – History, principles & types.
- k. Drugs used in the treatment of shock.

**III.   Anaesthetic agents.**

- Definition of general and local anaesthetics.
- Classification of general anaesthetics.
- Pharmacokinetics and Pharmacodynamics of inhaled anaesthetic agents.
- Intravenous general anaesthetic agents.
- Local anaesthetics – classification mechanism of action, duration of action and methods to prolong the duration of action. Preparation, dose and routes of administration.

**IV Analgesics**

- Definition and classification
- Routes of administration, dose, frequency of administration, Side effects and management of non opioid and opioid analgesics

V. Antihistamines and antiemetics-

- Classification, Mechanism of action, adverse effects, Preparations, dose and routes and administration.

VI. CNS stimulants and depressants

- Alcohol
- Sedatives, hypnotics and narcotics
- CNS stimulants
- Neuromuscular blocking agents and muscle relaxants.

VII. Pharmacological protection of organs during CPB

VIII. Inhalational gases and emergency drugs.

IX. Pharmacotherapy of respiratory disorders

- Introduction – Modulators of bronchial smooth muscle tone and pulmonary vascular smooth muscle tone
- Pharmacotherapy of bronchial asthma
- Pharmacotherapy of cough
- Mucokinetic and mucolytic agents
- Use of bland aerosols in respiratory care.
- 

X. Corticosteroids – Classification, mechanism of action, adverse effects and complications. Preparation, dose and routes of administration.

XI Diuretics

- Renal physiology
- Side of action of diuretics
- Adverse effects
- Preparations, dose and routes of administration.

XII. Chemotherapy of infections

- Definition
- Classification and mechanism of action of antimicrobial agents
- Combination of antimicrobial agents
- Chemoprophylaxis.
- Classification, spectrum of activity, dose, routes of administration and adverse effects of penicillin, cephalosporins, aminoglycosides, tetracyclines, chloramphenicol, antitubercular drugs.

XIII. Miscellaneous.

- IV fluids- various preparations and their usage.
- Electrolyte supplements
- Immunosuppressive agents
- New drugs included in perfusion technology.
- Drugs used in metabolic and electrolyte imbalance.

## PRACTICALS:

1. Preparation and prescription of drugs of relevance.
2. Experimental pharmacology directed to show the effects of commonly used drugs of relevance and interpretation of few charts.

### **Scheme of Examination *Theory***

There shall be one theory paper of three hours duration carrying 80 marks. Distribution of type of questions and marks for applied Pharmacology shall be as given under.

Type of Questions	No. of Questions	Marks	Sub-total
Long Essay (LE)	3 (To Attempt 2)	2 x 10	20
Short Essay (SE)	8 (To attempt 6)	6 x 5	30
Short Answer (SA)	12 (To Attempt 10)	10 x 3	30
Total Marks			80

### **NO PRACTICAL EXAMINATION**

Recommended Books.

1. R. S. Satoskar, S.D. Bhandarkar, S. S. Ainapure, Pharmacology and Pharmacotherapeutics, 18<sup>th</sup> Edition, single Volume, M/S Popular Prakashan, 350, Madan Mohan Marg, Tardeo, Bombay – 400 034.
2. K.D. Tripathi, Essentials of Medical Pharmacology, V. Edition, M/s. Jaypee Brothers, Post Box, 7193, G-16, EMCA House, 23/23, Bansari Road, Daryaganj, New Delhi.
3. Laurence and Bennet, Clinical Pharmacology, ELBS Edition, 9<sup>th</sup> Edition.

**Syllabus for Second year Allied Health science courses   RGUHS**  
**B.Sc Respiratory Care Technology**  
**APPLIED PATHOLOGY**

**I.    CARDIOVASCULAR SYSTEM**

- Atherosclerosis- Definition, risk factors, briefly Pathogenesis & morphology, clinical significance and prevention.
- Hypertension- Definition, types and briefly Pathogenesis and effects of Hypertension.
- Aneurysms – Definition, classification, Pathology and complications.
- Pathophysiology of Heart failure.
- Cardiac hypertrophy – causes, Pathophysiology & Progression to Heart Failure.
- Ischaemic heart diseases- Definition, Types. Briefly Pathophysiology, Pathology & Complications of various types of IHD.
- Valvular Heart diseases- causes, Pathology & complication. Complications of artificial valves.
- Cardiomyopathy – Definition, Types, causes and significance.
- Pericardial effusion- causes, effects and diagnosis.
- Congenital heart diseases – Basic defect and effects of important types of congenital heart diseases.

**II.   HAEMATOLOGY**

- Anaemia – Definition, morphological types and diagnosis of anaemia. Brief concept about Haemolytic anaemia and polycythaemia.
- Leukocyte disorders- Briefly leukaemia, leukocytosis, agranulocytosis etc.,
- Bleeding disorders- Definition, classification, causes & effects of important types of bleeding disorders. Briefly various laboratory tests used to diagnose bleeding disorders.

**III.   RESPIRATORY SYSTEM**

- Chronic obstructive airway diseases – Definition and types. Briefly causes, Pathology and complications of each type of COPD.
- Briefly concept about obstructive versus restrictive pulmonary disease.
- Pneumoconiosis- Definition, types, Pathology and effects in brief.
- Pulmonary congestion and edema.
- Pleural effusion – causes, effects and diagnosis.

**IV.   RENAL SYSTEM**

- Clinical manifestations of renal diseases. Briefly causes, mechanism, effects and laboratory diagnosis of ARF & CRS. Briefly Glomerulonephritis and Pyelonephritis.
- End stage renal disease – Definition, causes, effects and role of dialysis and renal transplantation in its management.
- Brief concept about obstructive uropathy.

## PRACTICALS

1. Description & diagnosis of the following gross specimens.
  - a. Atherosclerosis.
  - b. Aortic aneurysm.
  - c. Myocardial infraction.
  - d. Emphysema
  - e. Chronic glomerulonephritis.
  - f. Chronic pyelonephritis.
2. Interpretation & diagnosis of the following charts.
  - a. hematology Chart - AML, CML, Hemophilia, neutrophilia, eosinophilia.
  - b. Urine Chart - ARF, CRF, Acute glomerulonephritis.
3. Estimation of Hemoglobin.
4. Estimation Bleeding & Clotting time.

### **Scheme of Examination Theory**

There shall be one theory paper of three hours duration carrying 50 marks. Distribution of type of questions and marks for **Applied Pathology** shall be as given under.

Type of Questions	No. of Questions	Marks	Sub-total
Long Essay (LE)	3 (To Attempt 2)	2 x 10	20
Short Essay (SE)	5 (To attempt 3)	3 x 5	15
Short Answer (SA)	7 (To Attempt 5)	5 x 3	15
Total Marks			50

### **PRACTICAL EXAMINATION -**

40 Marks.

There will be a Combined Practical examination for Applied Pathology & Applied Microbiology.

Sl. No.	Tests	Marks
01	Interpretation of Hematology Chart	05
02	Interpretation of Urine Chart	05
03	Estimation of Hemoglobin	05
04	Estimation of Bleeding time & Clotting time	05
	Total	20

**Syllabus for Second year Allied Health science courses   RGUHS**  
**B.Sc Respiratory Care Technology**  
**APPLIED MICROBIOLOGY**

**THEORY – 40 HOURS**

1. Health care associated infections and Antimicrobial resistance: Infections that patients acquire during the course of receiving treatment for other conditions within a healthcare setting like Methicillin Resistant Staphylococcus aureus infections, Infections caused by Clostridium difficile, Vancomycin resistant enterococci etc. Catheter related blood stream infections, Ventilator associated pneumonia, Catheter Related urinary tract infections, Surveillance of emerging resistance and changing flora. The impact and cost attributed to Hospital Associated infection. 6 Hours
2. Disease communicable to Healthcare workers in hospital set up and its preventive measure: Occupationally acquired infections in healthcare professionals by respiratory route ( tuberculosis, varicella-zoster, respiratory syncytial virus etc ), blood borne transmission ( HIV, Hepatitis B, Hepatitis C, Cytomegalovirus, Ebola virus etc), oro faecal route ( Salmonella, Hepatitis A etc), direct contact ( Herpes Simplex Virus etc). Preventive measures to combat the spread of these infections by monitoring and control. 6 Hours
3. Microbiological surveillance and sampling: Required to determine the frequency of potential bacterial pathogens including Streptococcus pneumoniae, Haemophilus influenzae, and Moraxella catarrhalis and also to assess the antimicrobial resistance. Sampling: rinse technique, direct surface agar plating technique. 6 Hours
4. Importance of sterilization:
  - a. Disinfection of instruments used in patient care: Classification, different methods, advantages and disadvantages of the various methods.
  - b. Disinfection of the patient care unit
  - c. Infection control measures for ICU's 10 Hours
5. Sterilization:
  - a. Rooms: Gaseous sterilization, one atmosphere uniform glow discharge plasma (OAugDP).
  - b. Equipments: classification of the instruments and appropriate methods of sterilization.
  - c. Central supply department: the four areas and the floor plan for instrument cleaning, high-level disinfecting and sterilizing areas. 8 Hours
6. Preparation of materials for autoclaving: Packing of different types of materials, loading, holding time and unloading. 4 Hours

## PRACTICALS- 30 HOURS

1. Principles of autoclaving & quality control of Sterilization.
2. Collection of specimen from outpatient units, inpatient units, minor operation theater and major operation theater for sterility testing.
3. The various methods employed for sterility testing.
4. Interpretation of results of sterility testing.
5. Disinfection of wards, OT and Laboratory.

### PRACTICAL EXAMINATION -

40 Marks.

There will be a Combined Practical examination for Applied Pathology & Applied Microbiology.

Sl. No.	Tests	Marks
01	Dry heat / Moist heat: Temperature recording charts interpretation	05
02	Dry heat / Moist heat: Color change indicators interpretation	05
03	Air sampling culture plates interpretation of Colony forming units based on air flow rate and sampling time	05
04	Interpretation of Sterility of Hemodialysis water/Distilled water /Deionised water based on growth of colonies in BHI agar to be reported as X CFU/mL	05
	Total	20

### Scheme of Examination *Theory*

There shall be one theory paper of three hours duration carrying 50 marks. Distribution of type of questions and marks for **Applied Microbiology** shall be as given under.

Type of Questions	No. of Questions	Marks	Sub-total
Long Essay (LE)	3 (To Attempt 2)	2 x 10	20
Short Essay (SE)	6 (To attempt 4)	4 x 5	20
Short Answer (SA)	7 (To Attempt 5)	5 x 2	10
Total Marks			50

### PRACTICAL EXAMINATION -

40 Marks.

There will be a Combined Practical examination for Applied Pathology & Applied Microbiology.

# Syllabus for Second year Allied Health science courses **RGUHS** **B.Sc Respiratory Care Technology**

## **MEDICINE RELEVANT TO RESPIRATORY CARE TECHNOLOGY**

Brief mention about common diseases such as DM, hypertension, IHD  
Obesity, Elderly, Patient Pregnancy  
Respiratory failure (type, Signs, causes, assessment & management)  
Bronchial asthma and status asthmaticus  
Chronic bronchitis, emphysema & CDPD  
Adult respiratory distress syndrome  
AIDS  
Poliomyelitis & Gullian - Barre Syndrome  
Myasthenia gravis  
Status epilepticus  
Respiratory problems in children  
Sepsis & septic shock  
Poisoning  
Pneumonia-community acquired hospital acquired  
In immuno-compromised patient  
Lung abscess  
Atypical pneumonia  
Common viral and fungal infections  
Pulmonary tuberculosis  
Tropical eosinophilia  
Pulmonary oedema  
Acute lung injury  
Toxic inhalation  
Occupational lung  
Diseases of the pleura, mediastinum and chest wall

### **Scheme of Examination Theory**

There shall be one theory paper of three hours duration carrying 80 marks. Distribution of type of questions and marks for **Medicine relevant to Respiratory Care Technology** shall be as given under.

Type of Questions	No. of Questions	Marks	Sub-total
Long Essay (LE)	3 (To Attempt 2)	2 x 10	20
Short Essay (SE)	10 (To attempt 8)	8 x 5	40
Short Answer (SA)	12 (To Attempt 10)	10 x 2	20
Total Marks			80

### **NO PRACTICAL EXAMINATION**

**Syllabus for Second year Allied Health science courses RGUHS**  
**B.Sc Respiratory Care Technology**  
**INTRODUCTION TO RESPIRATORY CARE TECHNOLOGY**

Lectures

Patient contact techniques

Nonverbal Communication

- Aspects of nonverbal communication
- Definitions
- Characteristic

Universal Precautions

- Handwashing
- Insolation procedures

Assessment of vital signs

- General appearance
- Sensorium
- Pulsation
- Blood pressure
- Respiration

Chest topography

- Identification of imaginary lines
- Topographical landmarks of thorax ,Lungs & Pleura

Assessment of respiratory system

- Inspection Palpation, percussion and auscultation of respiratory system
- Definition and significance of the presence alteraed resonadge abnormal death sounds and advections sound

Assessment of cardiovascular system

- Topography of the heart
- Examination of the procardium
- Overall cardiovascular functions
- Symptoms of cardiovascular disease
- Radiovascular paid

Segment of other body System

- Skin and extermination
- Neurological system
- Abdomen

## Chest physical therapy

- Definition, indication / Contraindication
- techniques of chest physical therapy

## Gas Physics

- State of matter
- Temperature conversion
- Humidity
- pressure measurement
- Gas flows and diffusion
- Gas laws
- Discellaneous concepts such as density and specific gravity

## Medical Gas supply

- Compressed gas cylinders
- Colour coding
- Cylinders and Cylinders valves
- Cylinder storage
- Diameter index safety system
- Medical gas pipeline system and station outlets
- Air components
- Oxygen concentrators
- Alarms and safety revises

## Gas Administration devices (Reducing valves, flow meters and regulators).

- Simple oxygen administration devices
- Methods of controlling gas flow
- Reducing valve
- Flow meters
- Regulators
- Flow restrictors

## Oxygen therapy (rationale for oxygen therapy, precautions assessment of need and adequacy and therapy and the relevant devices)

- Definition
- Humidity therapy Definition
- Aerosol therapy definition
- Small volume nebuliser therapy – definition, physiological rationale

ECG – basic principles, normal ECG, interpretation in disease –

Introduction, value and limitation of chest X-ray, conventional and special radiological views

Pulmonary function testing – Definition

PFT - in disease and their significance

Provocative tests and postbronchodilator tests of lung function

**Scheme of Examination Theory**

There shall be one theory paper of three hours duration carrying **100** marks. Distribution of type of questions and marks for **Introduction to Respiratory Care Technology** shall be as given under.

Type of Questions	No. of Questions	Marks	Sub-total
Long Essay (LE)	3 (To Attempt 2)	2 x 10	20
Short Essay (SE)	14 (To attempt 12)	12 x 5	60
Short Answer (SA)	12 (To Attempt 10)	10 x 2	20
Total Marks			100

**PRACTICAL EXAMINATION -**

40 Marks.

**Syllabus for Third year Allied Health science courses   RGUHS**  
**B.Sc Respiratory Care Technology**  
**Paper – I Respiratory Care Technology - Clinical**

Symptoms of respiratory diseases

- Cough, Haemoptysis, dyspnoea, cyanosis Concept of disease, clinical Evaluation and management of the following Respiratory Diseases
- Acute Rhinitis
- Acute sinusitis
- Acute pharyngitis
- Laryngo tracheitis
- Epiglottitis

Lower respiratory tract infection

- Bronchitis
- Pneumonia – community acquired, hospital acquired
- Immunocompromised host
- Lung abscess
- Atypical pneumonia
- Common viral and fungal lower respiratory
- Pulmonary tuberculosis
- Tropical eosinophilia
- Acute obstructive pulmonary diseases and acute respiratory failure
- Pulmonary oedema
- Acute lung injury
- Toxic inhalation
- Bronchial asthma and other types of chronic obstructive pulmonary disease

Oxygen therapy (rationale for oxygen therapy, precautions assessment of need and adequacy and therapy and the relevant devices)

- Causes and responses to hypoxemia
- Clinical signs of hypoxemia
- Goals of oxygen therapy
- Oxygen therapy devices
- Hazards of oxygen therapy
- Uses of humidification
- Possible of inadequate humidification
- Possible results if leaked airway
- Types of humidifiers (including active and passive methods of humidification )
- Goals of aerosol therapy
- Hazards of aerosol therapy
- Assessment of aerosol therapy
- Factors influencing aerosol deposition in the lungs
- Particle deposition
- Aerosol generators

### Nebulisers and metered dose inhaler

- Types of nebulisers
- Aerosol output
- Small volume nebuliser therapy-definition, physiological rationale

### Gas Analysers (Oxygen ,Carbon - Dioxide)

- Gas analysis
- Transcutaneous oxygen monitors
- pulse oximeters
- Capnography

### Manual Resuscitators

- types of resuscitator bags, built airway
- Indications
- Hazards
- 

### Artificial air way (oral and Nasal Endotracheal tubes tracheostomy tubes)

- Parts of airway and features
- Types sizes and method of insertion
- Indications for use
- Care of long term airway and complications
- Face mask – types sizes and its usage

### **Scheme of Examination Theory**

There shall be one theory paper of three hours duration carrying **100** marks. Distribution of type of questions and marks for **Paper-I - Respiratory Care Technology - Clinical** shall be as given under.

Type of Questions	No. of Questions	Marks	Sub-total
Long Essay (LE)	3 (To Attempt 2)	2 x 10	20
Short Essay (SE)	14 (To attempt 12)	12 x 5	60
Short Answer (SA)	12 (To Attempt 10)	10 x 2	20
Total Marks			100

### **PRACTICAL EXAMINATION**

One common practical for all the three papers with equal weight age of marks i.e. 40 practical marks for each paper.

**Syllabus for Third year Allied Health science courses RGUHS**  
**B.Sc Respiratory Care Technology**  
**Paper – II Respiratory Care Technology - Applied**

Principles of mechanical ventilation –Airway resistance, lung compliance, dead space Ventilation, ventilatory failure, oxygenation failure, clinical conditions leading to mechanical ventilation. Operating modes of mechanical ventilation.

Monitoring in mechanical ventilation- concepts of monitoring, vital signs, chest inspection and auscultation, fluid electrolyte balance, arterial blood gases, oxygen and end tidal carbon dioxide monitoring

Management of mechanical ventilation-strategies to improve ventilation, improve oxygenation, acid base electrolyte balance and their correction. Fluid electrolyte nutrition balance and management. Troubleshooting of ventilator alarms and events, care of the ventilation circuit, care of the artificial airway.

Pharmacotherapy for mechanical ventilation – This includes drugs for improving ventilation, steroids, MDI medications, neuromuscular blocking agents like nitric oxide, propafol and Anaesthetic gases

Effect of PEEP- Pulmonary considerations, effects on the cardiovascular system, Haemodynamics, renal neurological considerations.

Basic ventilator waveform analysis.

Haemodynamics monitoring; ECG arterial catheter, CVP, pulmonary artery catheter, Cardiac output and vascular resistance calculation, Preload after load contractility assessment, calculation of haemodynamic values, monitoring of mixed venous saturation

Classification of mechanical ventilators- Ventilator classification, ventilatory work, drive mechanism, control circuits, control variables, phase variables, output waveform, alarm system.

Airway management in mechanical ventilation-intubation, common artificial airways, intubation procedures, management of endotracheal and tracheostomy tubes, extubation, complications of the above.

Tracheostomy minitracheostomy Endotracheal intubation

Humidification

**Scheme of Examination**

**Theory**

There shall be one theory paper of three hours duration carrying **100** marks. Distribution of type of questions and marks for **Paper-II - Respiratory Care Technology Applied** shall be as given under.

Type of Questions	No. of Questions	Marks	Sub-total
Long Essay (LE)	3 (To Attempt 2)	2 x 10	20
Short Essay (SE)	14 (To attempt 12)	12 x 5	60
Short Answer (SA)	12 (To Attempt 10)	10 x 2	20
Total Marks			100

**PRACTICAL EXAMINATION**

One common practical for all the three papers with equal weight age of marks i.e. 40 practical marks for each paper.

**Syllabus for Third year Allied Health science courses RGUHS**  
**B.Sc Respiratory Care Technology**  
**Paper – III Respiratory Care Technology - Advanced**

Initiation of mechanical ventilation- indications, contraindication, initial Ventilator settings, Ventilator alarm settings, hazards and complications  
 Weaning from mechanical ventilation- weaning and its failure, weaning criteria and indices, weaning procedure, signs, causes of weaning failure.  
 Neonatal mechanical ventilation – intubation and problems inherent to the neonate, surfactant replacement therapy, basic principles of neonatal ventilation, modes, initiation and maintenance, high frequency ventilation, liquid ventilation  
 Clinical situations with case studies of mechanical ventilation and management.  
 Noninvasive positive pressure ventilation – introduction, terminology, indications, CPAP, bi-level PAP,  
 Home mechanical ventilation-goals, indications, patient selection, equipment selection.  
 Miscellaneous – barotraumas, transport during ventilation, hyperbaric therapy, caissons disease and high altitude sickness, sleep apnea and related disorders, drug overdosing and poisoning requiring ventilation and their therapy, pulmonary edema, drowning, oxygen toxicity.

**Practical Exercises:**

1. Interpretation and correction of a given arterial blood gas
2. Interpretation and correction of a given electrolyte abnormality
3. Calculation of body surface area, nutritional requirement and fluid electrolyte requirement
4. Setting of ventilator for a given case
5. Managing a simulated ventilatory accident circuit including disconnection, kinking of tubes recognition of various alarms etc.
6. Identification of various respiratory circuit components and their used, method of sterilization and complications related them.
7. identification of drugs and their pharmacology
8. Calculating lung compliance, interpretation of a PFT and management

**Scheme of Examination Theory**

There shall be one theory paper of three hours duration carrying **100** marks. Distribution of type of questions and marks for **Paper-III - Respiratory Care Technology Advanced** shall be as given under.

Type of Questions	No. of Questions	Marks	Sub-total
Long Essay (LE)	3 (To Attempt 2)	2 x 10	20
Short Essay (SE)	14 (To attempt 12)	12 x 5	60
Short Answer (SA)	12 (To Attempt 10)	10 x 2	20
Total Marks			100

**PRACTICAL EXAMINATION**

One common practical for all the three papers with equal weight age of marks i.e. 40 practical marks for each paper
