**Note:**

- 1 Percentiles based on total marks assigned.
- 2 If total mark is tie, then percentage of PG marks is considered and higher percentile assigned to the higher scorer.
- 3 For Ayurveda alone, since there were mixed methods of grading PG marks, percentage of UG marks was considered.
- 4 if total marks, pg marks and ug marks were tied, then completed age of the candidate was considered and older age candidate was considered.
- 5 Percentile computation is based on the kth percentile formula  
$$\text{kth percentile} = (\text{no of candidates securing marks lower than the x value} / \text{total number of candidates appeared}) * 100$$
