

# REVISED ORDINANCE GOVERNING REGULATIONS AND CURRICULUM OF

## B.Sc. OPTOMETRY COURSE - 2019

Rajiv Gandhi University of Health  
Sciences, Karnataka, Bangalore

## The Emblem

The Emblem of the Rajiv Gandhi University of Health Sciences is a symbolic expression of the confluence of both Eastern and Western Health Sciences. A central wand with entwined snakes symbolises Greek and Roman Gods of Health called Hermis and Mercury is adapted as symbol of modern medical science. The pot above depicts Amrutha Kalasham of Dhanvanthri the father of all Health Sciences. The wings above it depicts Human Soul called Hamsa (Swan) in Indian philosophy. The rising Sun at the top symbolises knowledge and enlightenment. The two twigs of leaves in western philosophy symbolises Olive branches, which is an expression of Peace, Love and Harmony. In Hindu Philosophy it depicts the Vanaspathi (also called as Oushadi) held in the hands of Dhanvanthri, which are the source of all Medicines. The lamp at the bottom depicts human energy (kundalini). The script "Devahitham Yadayahu" inside the lamp is taken from Upanishath Shanth i Manthram (Bhadram Karnebh i Shrunuyanadev...), which says "May we live the full span of our lives allotted by God in perfect health" which is the motto of the Rajiv Gandhi University of Health Sciences.

ರಾಜೀವ್ ಗಾಂಧಿ ಆರೋಗ್ಯ ವಿಜ್ಞಾನಗಳ ವಿಶ್ವವಿದ್ಯಾಲಯ, ಕರ್ನಾಟಕ, ಬೆಂಗಳೂರು

Ref: ACA/DCD/AHS/OPTO/362(e)/2019-20

Date: 28/08/2019

**NOTIFICATION**

Sub: Revised Ordinance pertaining to Regulation and Curriculum of B.Sc. Optometry.

Ref: 1) Minutes of BOS Allied Health Sciences held on 13/05/2019  
2) Proceedings of Faculty meeting held on 15/05/2019  
3) Proceedings of AC meeting held on 17/06/2019  
4) Proceedings of Syndicate meeting held on 29/06/2019

In exercise of the powers vested under Section 35(2) of RGUHS Act, 1994, the Revised Ordinance pertaining to Regulation and the curriculum of B. Sc. Optometry is notified herewith as per Annexure.

The above Regulation shall be applicable to the students admitted to the said course from the academic year 2019-20 onwards.

By Order,  
Sd/-

**REGISTRAR**

To

The Principals of all affiliated Allied Health Sciences Course colleges of RGUHS, Bangalore.

Copy to :

1. The Principal Secretary to Governor, Raj Bhavan, Bangalore - 560001
2. The Principal Secretary Medical Education, Health & Family Welfare Dept., M S Building, Dr.B.R. Ambedkar Veedhi, Bangalore – 01
3. PA to Vice – Chancellor/PA to Registrar/Registrar (Eva.)/Finance Officer, Rajiv Gandhi University Health Sciences, Bangalore
4. All Officers of the University Examination Branch/ Academic Section.
5. Guard File / Office copy.

Optometry is a "Primary Eye Care Science" which covers the examination of human eye, Contact Lens, Orthoptics, Systems required for estimation of errors of refraction, the fitting, manufacturing and supply of optical aids

Quality of life, professional status, self-employment opportunities, and good monetary compensation were just a few of the reason Kiplinger's named the profession of Optometry as "One of the top 7 Great Careers." Additional the Job Rated Almanac (6th Edition) ranked the Optometric Profession in the upper twelfth percentile of top-ranked jobs.

### **Eligibility**

The candidates must have obtained a 50% marks taken together in English, Physics, Chemistry, Biology / Mathematics in the higher secondary examination that is equivalent to 10 + 2.

The candidates who have completed their 2 / 3 years' diploma in optometry can take admission directly in the second year of BSc Optometry.

**Age Criteria:** By 31<sup>st</sup> December of the year of admission, the candidate must complete a minimum age of 17 years.

**Optometric Education:** Optometry graduates must complete four years of graduate education at Indian Accredited College or School of Optometry

### **Career Options after completion of Optometry: -**

- Independent Practice as an Optometrist
- Start own specialty clinic like contact lenses, Computer vision, Orthoptics.
- Start an optical establishment/ store for scientific dispensing of visual aids.
- Start manufacturing unit to make ophthalmic lenses/ spectacle lenses
- Job opportunities with multinational eye care companies like Bausch & Lomb, Essilor, Zeiss, Ciba Vision, AMO, etc.
- Avail overseas job opportunities.
- For those interested in higher studies, post-graduation in the form of fellowships as well as Masters & PhD programs are available in India & overseas.
- Take up teaching as a career option
- Take jobs with corporate & private hospitals, NGOs.
- Administrative Career after MBA in Ophthalmic Practice

## **B.SC. OPTOMETRY DEGREE COURSE**

### **Section 1**

#### **Introduction**

The B.Sc. OPTOMETRY degree course is a four years academic, where much emphasis will be given in hands on training. This programme is designed to train students to become competent in the techniques of optometry, to work in evaluating and managing ophthalmic disorders.

#### **WORLD COUNCIL OF OPTOMETRY'S concept of Optometry:**

“Optometry is a health care profession that is autonomous, educated and regulated (licensed/registered), and optometrists are the primary healthcare practitioners of the eye and visual system who provide comprehensive eye and vision care, which includes refraction and dispensing, detection/diagnosis and management of ocular problems, and the rehabilitation of conditions of the visual system.”

---

## Regulations governing B.Sc. Optometry Course

### 1. ELIGIBILITY

#### 1.1 Qualifying Examination

A candidate desiring to join the four years programme leading to the B.Sc. Optometry degree

- a. should have passed the two year Pre University examination conducted by Department of Pre University Education, Karnataka State with English as one of the subjects and Physics, Chemistry , Biology / Maths as optional subjects. The candidate shall have passes the subjects of English, Physics, Chemistry, Biology / Maths individually also.

OR

- b. Shall have passed any other examination conducted by Boards/Councils/Intermediate examination established by State Governments/Central Government and recognized as equivalent to two year Pre University examination by the Rajiv Gandhi University of Health Sciences/Association of Indian Universities (AIU) with English as one of the subjects and Physics, Chemistry and Biology as optional Subjects and the candidate shall have passed subjects of English, Physics, Chemistry, Biology / Maths individually also.
  - c. Shall have passed Intermediate examination in Science of an Indian University/Board/Council or other recognized examining bodies with Physics, Chemistry and Biology, which shall include a practical test in these subjects and also English as compulsory subject. The candidate shall have passed subjects of English, Physics, Chemistry, Biology / Maths individually also.
  - d. Shall have passed first year of the three year degree course of a recognized University with Physics, Chemistry and Biology including a practical test in these subjects provided the examination is an 'University Examination' provided that the candidate shall have passed subjects of English, Physics, Chemistry, Biology / Maths individually in the pre university or other examinations mentioned in the clauses above.
  - e. Shall have passed B.Sc. Examination of an Indian University, provided that he/she has passed the B.Sc. examination with not less than two of the following subjects : Physics, Chemistry, Biology (Botany, Zoology) provided the candidate has passed subjects of English, Physics, Chemistry Biology / Maths individually in the qualifying examinations mentioned in clauses a, b and c.
-

- f. Candidates with two years diploma from a recognized Government Board in a subject for which the candidate desires to enroll, in the B.Sc. Optometry course, candidate shall have passed plus 12 [10+2] with Physics, Chemistry and Biology, as subjects or candidates with 3 years diploma from a recognized Government Board in a subject for which the candidate desires to enroll, in the B.Sc. Optometry course mentioned in Sl. No. Candidate should have studied Physics, Biology and Chemistry as subjects during the tenure of the course.
- g. Lateral entry to second year for B.Sc. Optometry courses for candidates who have passed diploma program from the Government Boards and recognized by RGUHS, fulfilling the conditions specified above under sl. No.(f) and these students are eligible to take admission on lateral entry system only in the same subject studied at diploma level from the academic year 2008-09 vide RGUHS Notification no. AUTH/AHS/317/2008-09 dated 01.08.2008.
- h. In case of admission to B.Sc. Optometry the candidate should have passed Pre-University or equivalent examination with Physics, Chemistry, Biology and Mathematics, as subjects of study.

**Note:**

- a. The candidate shall have passed individually in each of the subjects.
- b. Candidates who have completed diploma or vocational course through Correspondence shall not be eligible for any of the courses mentioned above.

**1.2 Age:** A candidate should have completed the age of 17 years as on 31<sup>st</sup> December of the year of admission.

**1.3 Selection**

Selection of the candidates should be based on the merit in the entrance examination held by the University or competent authority.

**2. DURATION OF THE COURSE**

The student shall undergo a period of certified study extending over 4 academic years from the date of commencement of his study for the subject comprising the prescribed curriculum to the date of completion of the examination, Project exams at end of 4<sup>th</sup> year.

---

### 3. ATTENDANCE

Every candidate should have attendance not less than 80% of the total classes conducted in theory and practical's separately in each calendar year calculated from the date of commencement of the term to the last working day as notified by the University in each of the subjects prescribed to the eligible to appear for the university examination. A candidate pursuing the course shall study in the college for the entire period as a full time student. No candidate should join any other course of study or appear for any other examination conducted by this university or any other university in India or abroad during the period of registration.

A candidate lacking in the prescribed attendance should not be permitted to appear for the examination in that subject(s)

### 4. MEDIUM OF INSTRUCTION

English shall be the medium of instruction for all subjects of study and for examinations.

### 5. TEACHING HOURS

#### 1<sup>ST</sup> Year

Subject	Method / Number of Hours	
	Theory	Practicals
General Anatomy & General physiology	90	40
Basic Biochemistry & Nutrition	70	30
Ocular Anatomy ,ocular Physiology & biochemistry	90	40
Physical & Geometric Optics & principles of lighting	180	70
Computer Basics & Computer Programming	40	40
Functional English & Communications	30	-
Mathematics	30	-
Kannada	20	
Basic Accountancy	20	

#### 2<sup>ND</sup> Year

Subject	Method / Number of Hours	
	Theory	Practicals
Optometric Optics & Dispensing optometry	120	100
Clinical Examination Of Visual System & Optometric Instruments	120	100

Visual optics	90	60
Pharmacology, Microbiology & Pathology	60	40
Medical Psychology	20	-
Clinics	-	270

### 3<sup>RD</sup> Year

Subject	Method / Number of Hours	
	Theory	Practicals
Contact Lenses	60	60
Systemic & Ocular diseases	90	70
Low Vision Aids & Geriatric Optometry	30	30
Practice management, law in optometry & occupational optometry	50	30
Research Methodology & Biostatistics	50	-
Pediatric Optometry, Advances In Optometry & Binocular Vision	90	80
Clinics & Special Clinics	-	270

### 4<sup>th</sup> year

Project	-	1 year
CLINICAL POSTING & SPECIALITY POSTING		

## SCHEME OF EXAMINATION

### 6 Regular Assessment

Regular periodic assessment shall be conducted throughout the course.

### 7. University Examination – Subjects and Distribution of Marks

**Non- University Examination:** These are internal examination subject for which no university assessment would be made.

## Bachelors in Optometry

### University Examination – Subjects and Distribution of Marks

#### 7.1 1<sup>st</sup> Year Examination

Subject	University Examination				Total
	Theory	Internal	Practicals	Viva Voce	
Basic Biochemistry & Nutrition	80	20	-	-	<b>100</b>
General Anatomy (sec A)	40	10			<b>100</b>
General physiology (sec B)	40	10			
Ocular I Anatomy , ocular Physiology & Ocular biochemistry	80	20	-	-	<b>100</b>
Physical & Principles of Lighting (sec A)	40	10	80	20	<b>200</b>
Geometric Optics (sec B)	40	10			
<b>Non- University Examination</b>					
Computer programming*	50				
English*	50				
Mathematics	50				
Basic Accounts	50				
Computer Basics	50				

#### Mark Distribution

The mark distribution for all the three subjects with section A and section B are as follows:

- |                             |                |
|-----------------------------|----------------|
| 1. Long essay 3 Questions   | 2x10= 20 marks |
| 2. Short essay 3 Questions  | 2x 5= 10 marks |
| 3. Short answer 5 Questions | 5x2= 10marks   |

#### 7.2 2<sup>ND</sup> Year Examination

Subject	University Examination				Total
	Theory	Internal	Practicals	Viva Voce	
Optometric Optics & Dispensing	80	20	-	-	<b>100</b>

Optometry					
Visual Optics	80	20	-	-	<b>100</b>
CEVS & Optometric instruments	80	20	-	-	<b>100</b>
Microbiology, Pathology(sec A)	40	10	-	-	<b>100</b>
Pharmacology(sec B)	40	10			
Clinical practical examination		-	80	20	<b>100</b>
<b>Non- University Examination</b>					
Medical Psychology*	50				
Communications & Public relations*	50				

## Mark Distribution

### 1. Optometric Optics

1. Long essay 4 Questions
2. Short essay 7 Questions
3. Short answer 10 Questions

3x10= 30 marks  
6x5= 30 marks  
10x2= 20 marks

**Total= 80**

### 2. Visual Optics

1. Long essay 4 Questions
2. Short essay 7 Questions
3. Short answer 10 Questions

3x10= 30 marks  
6x5= 30 marks  
10x2= 20 marks

**Total= 80**

### 3. CEVS & Optometric instruments

1. Long essay 4 Questions
2. Short essay 7 Questions
3. Short answer 10 Questions

3x10= 30marks  
6x5= 30 marks  
10x2= 20 marks

**Total= 80**

### 4. Microbiology, Pathology (sec A)

1. Long essay 3 Questions
2. Short essay 3 Questions
3. Short answer 5 Questions

2x 10= 20 marks  
2x 5= 10 marks  
5x 2= 10 marks

#### Pharmacology (sec B)

4. Long essay 3 Questions
5. Short essay 3 Questions
6. Short answer 5 Questions

2x 10= 20 marks  
2x 5= 10 marks  
5x2= 10marks

**Total=80**

## 7.3 3<sup>rd</sup> Year Examination

Subject	University Examination				Total
	Theory	Internal	Practical	Viva Voce	
Low Vision Aids & Geriatric Optometry	80	20	-	-	<b>100</b>
Contact Lens	80	20	-	-	<b>100</b>
Research Methodology & Statistics	80	20			<b>100</b>

Systemic diseases (sec A)	40	10	-	-	<b>100</b>
Ocular Diseases (sec B)	40	10			
Practice Management & law in optometry (sec A)	40	10	-	-	<b>100</b>
Occupational Optometry (sec B)	40	10			
Pediatric Optometry, Binocular vision & Advances in Optometry	80	20	-	-	<b>100</b>
Clinics & Specialities		-	160	40	<b>200</b>
<b>Non- University Examination</b>					
Public health, Epidemiology	50				

## Mark Distribution

### 1. Low Vision Aids & Geriatric Optometry

- |                              |                 |
|------------------------------|-----------------|
| 1. Long essay 4 Questions    | 3x10= 30 marks  |
| 2. Short essay 7 Questions   | 6x5= 30marks    |
| 3. Short answer 10 Questions | 10x2= 20 marks  |
|                              | <b>Total=80</b> |

### 2. Contact Lens

- |                              |                 |
|------------------------------|-----------------|
| 1. Long essay 4 Questions    | 3x10= 30marks   |
| 2. Short essay 7 Questions   | 6x5= 30 marks   |
| 3. Short answer 10 Questions | 10x2= 20 marks  |
|                              | <b>Total=80</b> |

### 3. Systemic diseases (sec A)

- |                             |                |
|-----------------------------|----------------|
| 1. Long essay 3 Questions   | 2x10= 20 marks |
| 2. Short essay 3 Questions  | 2x5= 10 marks  |
| 3. Short answer 5 Questions | 5x2= 10 marks  |

### Ocular Diseases (sec B)

- |                             |                 |
|-----------------------------|-----------------|
| 4. Long essay 3 Questions   | 2x10= 20 marks  |
| 5. Short essay 3 Questions  | 2x5= 10 marks   |
| 6. Short answer 5 Questions | 5x2= 10 marks   |
|                             | <b>Total=80</b> |

### 4. Dispensing Optometry (sec A)

- |                             |                |
|-----------------------------|----------------|
| 1. Long essay 3 Questions   | 2x10= 20 marks |
| 2. Short essay 3 Questions  | 2x5= 10 marks  |
| 3. short answer 5 Questions | 5x2= 10 marks  |

### Occupational Optometry (sec B)

- |                             |                 |
|-----------------------------|-----------------|
| 4. Long essay 3 Questions   | 2x10= 20 marks  |
| 5. Short essay 3 Questions  | 2x5= 10 marks   |
| 6. short answer 5 Questions | 5x2= 10 marks   |
|                             | <b>Total=80</b> |

### 5. Pediatric Optometry, Binocular vision & Advances in Optometry

- |                              |                |
|------------------------------|----------------|
| 1. Long essay 4 Questions    | 3x10= 30 marks |
| 2. Short essay 7 Questions   | 6x5= 30 marks  |
| 3. short answer 10 Questions | 10x2= 20 marks |

**Total=80**

4<sup>th</sup> year

Subject	University Examination				Total
	Theory	Internal	Practical	Viva Voce	
Project			80	20	100
Clinical Examination			160	40	200

## 8. Eligibility for Examination

To be eligible to appear for University examination a candidate

- a. Shall have undergone satisfactorily the approved course of study in the subject/subjects for the prescribed duration.
- b. Shall have attended at least 80% of the total number of classes in theory and practical/clinical to become eligible to appear for the examination in that subject/subjects.
- c. Shall fulfill any other requirement that may be prescribed by the university from time to time.

## 9. Criteria for pass

For declaration of pass in any subject in the university examination, a candidate shall pass both in theory and practical/clinical examination components separately as stipulated below:

- The theory component comprises of marks obtained in the University written paper. For a pass in theory, a candidate shall secure not less than 50%. For a pass in practical/clinical examination, a candidate shall secure not less than 50%, marks in aggregate, i.e., marks obtained in university practical/clinical examination and viva voce added together.
- A candidate not securing 50% marks in aggregate in Theory or Practical/Clinical examination in a subject shall be declared to have failed in that subject and is required to appear for both Theory and Practical/Clinical again in the subsequent examination in that subject.

## 10. Carry over benefit

### 10.1 First year examination:

A candidate who fails in any one of the four main subject of first year shall be permitted to carry over those subject to second year. However, he/she must pass the carry over subject before appearing for second year examination; otherwise he/she shall not permitted to proceed to third year.

---

### **10.2 Second year examination.**

A candidate is permitted to carry over any one over any one main subject to the third year but shall pass this subject before appearing for the third year examination.

### **10.3 Third year examination.**

A candidate is permitted to carry over any one over any one main subject to the fourth year but shall pass this subject before appearing for the fourth year examination.

## **11. Declaration of Class**

- a. A candidate having appeared in all subjects in the same examination and passed that examination in the first attempt and secures 75% of marks or more of grand total marks prescribed will be declared to have passed the examination with distinction.
- b. A candidate having appeared in all subjects in the same examination and passed that examination in the first attempt and secures 65% of marks or more but less than 75% of grand total marks prescribed will be declared to have passed the examination in First Class.
- c. A candidate having appeared in all subjects in the same examination and passed that examination in the first attempt and secures 50% of marks or more but less than 65% of grand total marks prescribed will be declared to have passed the examination in Second Class.
- d. A candidate passing a university examination in more than one attempt shall be placed in Pass class irrespective of the percentage of marks secured by him/her in the examination.  
Fraction of marks should not be rounded off for clauses (a), (b) and (c).

**Degree would be awarded after passing all academic examination held by RGUHS.**

---

# FIRST YEAR B.Sc. OPTOMETRY

- Physical Optics & principle of lighting (Sec A) Geometric Optics (Sec B)
- General Anatomy (Sec A) & Physiology (Sec B)
- Ocular Anatomy, Physiology & Ocular biochemistry
- General Biochemistry & Nutrition

## PHYSICAL OPTICS (THEORY)

SL NO	TOPICS	HOURS
1	Nature of light: An overview Corpuscular Theory, Wave Theory, quantum theory and dual nature	02
	Simple Harmonic Motion Definition, Mathematical representation, energy in SHM, combination of two SHMs (along a line and at right angles). Waves : Transverse and Longitudinal, mathematical representation of a wave, wave fronts, path difference and phase difference, coherent waves, Numerical.	10
	Interference of light Theory of interference-Conditions for interference, Young's double slit experiment, Expression for fringe width, Intensity distribution of the double slit interference pattern, condition for good contrast.	10
	Interference in thin films: Reflection phase shifts, optical path length. Interference in thin parallel films of uniform thickness, variable thickness (air wedge, Newton's rings), their applications to antireflection coatings, optical flatness of reflecting surfaces, determination of $\lambda$ : wavelength, refractive index, thickness of thin films, radius of curvature, Michelson interferometer, Numerical	10
2	Diffraction – Introduction, Fresnel and Fraunhofer diffraction. Fresnel diffraction: Rectilinear propagation of light, Zone plate, Theory of Fresnel's half period zone. Numerical. Fraunhofer Diffraction: Diffraction pattern from single slit, Double slit. Diffraction pattern due to N Slits-Theory of plane transmission grating. Resolving power of the diffraction grating. Numerical.	

3	Polarization – Review of light as a transverse wave. Polarization phenomenon due to reflection, refraction and scattering Brewster’s and Malus’ laws. Polaroids. Double refraction, retardation plates, Nicol prism as a device to produce polarized light, dichroism, equation to polarization ellipse, elliptical, circular and linear polarizations, their production and detection  Optical activity, Lorentz half shade polarimeter, determination of specific rotation	10
4	Absorption and scattering: General and selective absorption, Distinction between absorption and scattering, absorption by solids, liquids and gases, scattering: Rayleigh, Mie and Raman scattering.	08
5	Radiometry and Photometry – Electromagnetic spectrum, Radiometry, Photometry, sources of optical radiation and detectors of radiation.	06
6	Laser basics: Introduction, Einstein quantum theory of radiation, Essentials of a laser, Ruby laser, Holography, Numerical.	08
7	Fiber Optics: Structure, Optics of propagation, Attenuation, Distortion, Numerical.	6
8	The particle nature of radiation :Photoelectric effect, Compton effect(no derivation of Compton shift equation), Numerical	6
	TOTAL	<b>86</b>

#### PHYSICAL OPTICS - PRACTICAL

Any 10 of the following experiments

#### RECOMMENDED BOOKS

1. Fundamentals of Optics – 4<sup>th</sup> edition – Francis.A.Jenkins and Harvey.E.White.

2. A textbook of Optics – N.Subrahmanyam and Brij Lal.
3. Introduction to optics – Frank.L.Pedrotti and Leno.S.Pedrotti.
4. Physics for scientists and Engineers with modern Physics, Vol 2, 6<sup>th</sup> Edition, Serway and Jewett

### GEOMETRICAL OPTICS – THEORY

SL NO	TOPICS	HOURS
1	Properties of light: Classification of optics based on the nature and properties of light. The rectilinear propagation of light, Umbra and Penumbra, Speed of light in vacuum and in a stationary media, Beam, pencil and ray of light, Laws of reflection and refraction, Refractive index, Optical path, Graphical construction for refraction, Principle of reversibility, Fermat's principle (only qualitative discussion), Color dispersion. Numerical	8
2	Plane surfaces and Prisms: Parallel beam, the critical angle and total reflection, Plane parallel plate, Refraction by a prism, Minimum deviation, Thin prisms, Graphical method of ray tracing, Direct vision prisms, Reflection of divergent rays, Refraction of divergent rays, Images formed by paraxial rays. ophthalmic prisms. Numerical.	08
3	Spherical surfaces: Introduction, Focal points and focal lengths, Image formation, Virtual images, conjugate points and planes, Convention of signs, Graphical constructions (parallel ray method only), Magnification, Vergence and reduced vergence, Gaussian formula. Numerical.	08
4	Spherical mirrors – focal points, focal lengths, image formation, mirrors and vergence, reflection matrix, aspheric mirrors	02
5	Thin lenses: Lenses, Focal points and focal lengths, Image formation: graphical method (parallel ray and oblique ray methods) and derivation of lens formula, conjugate points and planes. Lateral magnification, Virtual images, Lens makers' formula, Power of a thin lens, Thin lenses in contact, without contact. Numerical.	06
6	Thick lenses: Image formation: graphical method (both parallel ray and oblique ray methods), Focal points, principal points, nodal points and optical center, thick lens formulas (no derivation). Numerical	08
7	Matrix methods in paraxial optics: Introduction, Translation matrix, Refraction matrix, Reflection matrix and Thick lens and thin lens matrices. Numerical.	08
8	Aberration theory :Spherical (coma, astigmatism, curvature of field and distortion) and chromatic aberrations and their minimization including GRIN systems(qualitative description only).	08
9	Optics of the Eye: Biological structure of the eye, Optical representation of the eye, Functions of the eye, Errors of refraction and their correction, Laser therapy for ocular defects. Depth of focus	08

10	Aperture and stops :Field stop and Aperture stop, Entrance and exit pupils, chief ray, Front stop, stop between two lenses, two lenses with no stop, field of view	06
11	Optical Instruments – The Camera, eye and its refractive anomalies, simple magnifier, compound microscope and telescopes. 4 Hours	08
		78

**PRINCIPLES OF LIGHTING:**

<b>SL NO</b>	<b>TOPICS</b>	<b>HOURS</b>
1	Visual tasks: factors affecting visual tasks	2
2	Modern theory on light & colour: synthesis of light	2
3	Additive & subtractive synthesis of colour	2
4	Light sources: Modern light sources – spectral energy distribution – luminous efficiency – colour temperature – colour rendering]	2
5	Illumination: Luminous flux, candela, solid angle, illumination, utilization factor, depreciation factors, illumination laws	2
6	Lighting installation: glare, luminaries, lighting fixtures, types of lighting	2

7	Photometry: measurement of illumination, photometers and filters	2
8	Eye care and lighting – special care with VDU.	2
		16

#### RECOMMENDED BOOKS

1. Fundamentals of Optics – 4th edition – Francis.A.Jenkins and Harvey.E.White.
2. A textbook of Optics – N.Subrahmanyam and Brij Lal.
3. Introduction to optics – Frank.L.Pedrotti and Leno.S.Pedrotti.
4. Physics for scientists and Engineers with modern Physics, Vol 2, 6th Edition, Serway and Jewett
5. Introductory lighting (Illuminating engineering society of North America)
6. Environmental vision (Pitts)

#### GENERAL ANATOMY

SL NO	TOPICS	HOURS
1	Introduction- Anatomy and it's sub-division, planes of the body, terms in relation of structures, Regional Anatomy, organ system, osteology of orbital bones	
2	Tissues of the body [ Histology of the body tissues] 2.1 Epithelium 2.2 Connective tissue 2.3 Bone and cartilage 2.4 Muscles: Skeletal, smooth, cardiac 2.5 Blood vessels 2.6 Neuron, Neuroglia 2.7 Glands, exocrine and endocrine, lacrimal gland in detail 2.8 Skin and appendages 2.9 Lymphoid Tissues 2.10 Ganglian	45
3	Organ systems: [General plan] 3.1 Locomotor system: Bones, muscles, joints 3.2 Cardiovascular systems: Heart, Regional blood vessels- arteries, veins 3.3 Lymphatic system including immune system 3.4 Digestive system 3.5 Respiratory system 3.6 Reproductive system 3.7 Endocrine system 3.8 Central nervous system- spinal and brain stem, cerebellum, cerebrum, spinal, cranial nerves 3.9 ganglia	

## RECOMMENDED BOOKS

1. Human anatomy	B.D.Chourasia
2. Text book of human anatomy	H.Gray
3. Anatomy and Physiology of the eye	A.K.Khurana, Indu Khurana
4. Clinical anatomy of the eye	S.Snell, A.Lemp
5. Text book of Anatomy	Vishram singh

## GENERAL PHYSIOLOGY

SL NO	TOPICS	HOURS
1	1.1. Cell structure and organization 1.2 Gene action 1.3. Tissue organization – Epithelium 1.1. Connective tissue - Collagen fibers- elastic fibers- areolar fibers- cartilage- bone 1.5. Contractile tissue- striated – skeletal –cardiac- non striated –plain myoepithelial 1.6. General principles of cell physiology 1.7. Electrophysiology of cells 1.8. Physiology of skeletal muscles	
2	Blood 2.1 Composition 2.2 Volume measurement and variations 2.3 Plasma proteins- classification and functions 2.4 RBC's- development, morphology and measurement- functions and dysfunctions 2.5 WBC's- development – classifications - morphology–functions and dysfunctions 2.6. Platelets –morphology-development, functions and dysfunctions 2.7 Clotting- factors- mechanism- anticoagulants- dysfunctions 2.8. Blood grouping –classifications- importance in transfusion, Rh factor & incompatibility 2.9. Suspension stability 2.10. Osmotic fragility 2.11. Reticulo endothelial system Spleen                      – lymphatic tissue Thymus                     - Bone marrow Immune system         - cellular - humoral- autoimmune	
3	Digestion 3.1. General arrangement 3.2. Salivary digestion – functions and regulations 3.3. Gastric digestion –functions and regulations 3.4. Pancreatic digestion- functions and regulations 3.5. Intestinal digestion – functions and regulations 3.6. Liver and Bile 3.7. Absorption 3.8. Motility-Deglutition-Gastric-Intestinal-Vomiting-Defecation 3.9. Functions of large intestine 3.10. Neurohumoral regulations of alimentary functions, summary	45

4	Excretion 4.1. Body fluids – distribution, measurement and exchange 4.2. Kidney –structure of nephron – mechanism of urine formation-composition of urine and abnormal constituents- urinary bladder and micturition	
5	Endocrine system 5.1. Hormone mechanism – negative feedbacks- tropic action –Permissive action – cellular actions 5.2. Hypothalamic regulation 5.3. Hormones, Actions & Regulations of <ul style="list-style-type: none"> <li>✓ Hypophysis</li> <li>✓ Thyroid</li> <li>✓ Adrenal Cortex &amp; medulla</li> <li>✓ Parathyroid</li> <li>✓ Islets of pancreas</li> <li>✓ Miscellaneous</li> </ul> 5.4. Common clinical disorders	
6	Reproduction 6.1. Male reproductive system- control and regulation-semen analysis 6.2. Female Reproductive system- Uterus -ovaries- menstrual cycle- Regulation -Pregnancy and delivery-breast – family planning	
7	Respiration 7.1. Mechanics of respiration 7.2. pulmonary function tests 7.3. Transport of respiratory gases 7.4. neural and chemical regulation of respiration 7.5.hypoxia cyanosis- dyspnoea- asphyxia	
8	Circulation 8.1. Heart: myocardium- innervation- transmission of cardiac Impulse-Events during cardiac cycle-cardiac output 8.2. Peripheral circulation: Peripheral resistance- Arterial blood pressure measurements- factors regulating variation – capillary circulation-venous circulation 8.3. Special circulation: coronary – cerebral 4.4.miscellaneous	
9	Nervous system 9.1. Neuron – conduction of impulse – synapse – receptor 9.2. Sensory organization- pathways and perception. Reflexes 9.3. cerebral cortex – functions 9.4. Thalamus- basal ganglia – Cerebellum – Hypothalamus 9.5. Autonomic nervous system- motor control of movements, posture and equilibrium- conditioned reflex, Eye hand co-ordination. Sleep, consciousness, behavior , memory	
10	Environmental Physiology 10.1. Body temperature regulation [including skin physiology] 10.2. Exposure to low and high atmospheric pressure	
11	Special senses [elementary] 11.1. Olfaction- Taste- Hearing- vision	
		45

<b>GENERAL PHYSIOLOGY - DEMONSTRATION</b>		
1	Microscope & Haemocytometer	
2	Blood 2.1. RBC count 2.2. Hb 2.3. WBC count 2.4. Differential count 2.5. Hct Demonstration 2.6. ESR 2.7. Blood group and Rh type 2.8. Bleeding time and clotting time	20
3	Digestion – Test salivary digestion	
4	Excretion 4.1. Examination of urine ✓ Specific Gravity ✓ Albumin ✓ Sugar ✓ Microscopic examination for cells and cyst	
5	Endocrinology & Reproduction 5.1. Dry experiments in the form of cases showing different endocrine Disorders	
6	Respiratory system 6.1. Clinical examination of respiratory system 6.2. Spirometry 6.3. Breath holding test 6.4. endurance test	
7	Cardiovascular system 7.1. Clinical examination of circulatory system ✓ Measurement of blood pressure and pulse rate ✓ Effect of exercise on blood pressure and pulse rate	
8	Central Nervous System 8.1. Sensory system 8.2. Motor system 8.3. Cranial system 8.4. Superficial and deep reflexes 8.5. Test for hearing	
		<b>20</b>

### RECOMMENDED BOOKS

- |  |                                   |
|--|-----------------------------------|
| 1. Text book of medical physiology       | Guyton                            |
| 2. Human physiology                      | AK Jain, Indu Khurana             |
| 3. Human physiology                      | Chatterjee                        |
| 4. Adler's physiology of the eye         | Robert.A.Moses, William.M.Hart.Jr |
| 5. Text book ocular anatomy & physiology | AK Khurana                        |

## OCULAR PHYSIOLOGY

SL NO	TOPICS	HOURS
1	<ol style="list-style-type: none"> <li>1. Protective mechanisms in the eye.</li> <li>2. Precorneal tear film and lacrimation</li> <li>3. Extrinsic ocular muscles, their action and control of their movements.</li> <li>4. Coats of the eyeball</li> <li>5. Corneal physiology – Hydration, Metabolism, Corneal wound healing, Transparency, Permeability</li> <li>6. Aqueous humour - Production, Circulation, Drainage and Intra ocular pressure</li> <li>7. Vitreous Humour</li> <li>8. Iris – pupil reaction</li> <li>9. Crystalline lens and accommodation – Presbyopia</li> <li>10. Retina – Physiology of RPE, Scotopic &amp; Photopic vision, neural signal, retinal synapses, Photo transduction, Information processing, Retinal metabolism</li> <li>11. | 4. Adler's physiology of the eye   | Robert.A.Moses, William.M.Hart.Jr |

## OCULAR ANATOMY

1	<b>1.1 Introduction to anatomical terminologies</b> – cross section of eyeball <b>1.2 Ocular Adnexa</b> a. Eye Brows b. Eyelids – Structure, Facial spaces, Arterial supply, nerve supply, venous & lymphatic drainage c. Conjunctiva – general arrangements, structure, glands, arteries, veins, caruncle, plica semilunaries <b>1.3 Lacrimal System</b> – Lacrimal Gland, Drainage, Tear film <b>1.4 Extraocular Muscles</b> - anatomy, innervations, actions
2	<b>Cornea:</b> layers, cellular structures, refractive properties
3	<b>Coats of eye ball</b> Sclera (Episclera & Sclera) Choroid, Ciliary body, Iris Retina (Detailed anatomy, cellular structure, blood supply and nerve supply)
4	<b>Aqueous, anterior chamber, Intraocular pressure, vitreous body</b>
5	<b>Pupil &amp; Pupillary pathway and its lesions</b>
6	<b>Crystalline lens</b> – structure, suspension, accommodation
7	<b>Orbit</b> Orbital margin, Walls of orbital cavity Orbital structure & Foramen Surface anatomy, Relations of bony orbit, Orbital Muscles
8	<b>Cranial Nerves</b> 1. Optic nerve 2. Oculomotor nerve 3. Trochlear Nerve 4. Abducent nerve 5. Facial Nerve (Nuclei, course, relationship with brain, ocular contribution in detail)
9	<b>Visual Pathway</b> – Definition, anatomy of visual pathway, visual reflexes, Lesions of visual pathway
10	<b>Ocular Embryology</b>
	Total
3	Demonstration 3.1. Practical dissection of Bull's eye 3.2. Practical demonstration of orbital structures

### OCULAR BIOCHEMISTRY

SL NO	TOPICS	HOURS
1	Importance of ocular biochemistry in clinical optometric practice	<b>30</b>
2	Tear film ✓ Composition - Lipid layer - Aqueous layer - Mucoïd layer - Tear Secretion Functions & dysfunction – Diagnostic tests – Tear substitutes – Recent development	
3	Cornea ✓ Biochemical composition of epithelium – bowman’s layer-stroma- Descemet’s layer- endothelium-functions- corneal metabolism –nutrient uptake- energy-transparency- barrier mechanism-pump action-irrigating solutions –aging and other anomalies-recent developments	
4	Lens ✓ Composition-metabolism-glucose utilization- sorbitol pathways- Glutathione and ascorbic acid transport- transparency- cataract formation- aging photo oxidation- sugar cataract- cataract and ascorbic acid – medical therapy- recent developments	
5	Aqueous humour ✓ Composition- function-Ciliary body-aqueous humour production-IOP- Glaucoma	
6	Vitreous humour ✓ Structure-composition functions- vitreous biochemical pathology- Intraocular gels- recent developments	
7	Retina ✓ Pigment epithelium-structure-composition-photoreceptor cells-rhodopsin – lipids renewal- inner segment – Pigment epithelium – choroid- metabolism and function- phagocytosis- vitamin A- retinal function and metabolism. Retinal neurochemistry Monoamines-acetyl choline- gaba-aminoacids- taurine- neuropeptides. Biochemical correlates of retinal diseases	
8	Free Radicals and Antioxidants Mechanism of Lipid Peroxidation- oxidative damage to the lens- vulnerability of the Retina to Free Radicals – Antioxidants in the Retina and RPE – Vitamin E – Ascorbate - Carotenoids	
		<b>30</b>

### GENERAL BIOCHEMISTRY & NUTRITION

SL NO	TOPICS	HOURS
1	Carbohydrate Chemistry; Definition, general classification with examples, composition, sources, properties and functions of Monosaccharides, Disaccharides, Oligosaccharides and Polysaccharides. Glycosaminoglycans (mucopolysaccharides-in detail)	4
2	Lipid Chemistry ; Definition, general classification Definition, classification, and functions of Fatty acids, Cholesterol, Essential fatty acids , Phospholipids and their importance	3
3	Amino-acid Chemistry; Amino acid chemistry: Definition, Classification, Peptide bonds, Peptides: Definition, Biologically important peptides. Protein chemistry: Definition, Classification, Functions of proteins, Collagens, Plasma proteins, Muscle proteins	6
4	Enzymes; Definition, Active site, Cofactor (Coenzyme, Activator), Proenzyme. Classification with examples, Factors effecting enzyme activity, Mechanism of enzyme action. Diagnostic enzymology (clinical significance of enzymes)	5
5	Nucleotide and Nucleic Acid Chemistry; Nucleotide chemistry: Nucleotide composition, functions of free nucleotides in body. Nucleic acid (DNA and RNA) chemistry: Difference between DNA and RNA, Structure of DNA (Watson and Crick model), Functions of DNA. Structure and functions of tRNA, rRNA, mRNA.	3
6	Digestion and Absorption; General characteristics of digestion and absorption, Digestion and absorption of carbohydrates, proteins and lipids. Disorders of digestion and absorption – Lactose intolerance,	3
7	Fundamentals of Biological oxidative reactions-ATP formation.	3
8	Carbohydrate Metabolism; Introduction, Glycolysis – Aerobic, Anaerobic, Citric acid cycle, HMP Shunt pathway,	4
9	Lipid Metabolism; Introduction to lipid metabolism, Lipolysis, $\beta$ -oxidation of fatty acids, Ketone body metabolism: Ketone body formation (ketogenesis), utilization (ketolysis), ketosis, Rothera's test. Cholesterol metabolism: degradation, cholesterol transport Hypercholesterolemia and its effects (atherosclerosis and coronary heart diseases) Hypocholesterolemic agents,	5
10	Amino acid and Protein Metabolism; Catabolism of amino acids - Introduction, transamination, deamination, Fate of ammonia, transport of ammonia, Urea cycle Specialized products formed from amino acids - from glycine, arginine, methionine, phenylalanine and tyrosine.	3
11	Vitamins ; Definition, classification according to solubility, Individual vitamins( Water soluble & fat soluble) - Sources, Coenzyme forms, functions, RDA, digestion, absorption and transport, deficiency and toxicity	8
12	Mineral Metabolism; Definition, Sources, RDA, Digestion, absorption, transport, excretion, functions, disorder of Individual minerals - Calcium, phosphate, iron, Magnesium, fluoride, selenium, molybdenum, copper. Phosphate, calcium and iron in detail	5
13	Cell Biology; Introduction, Cell structure, Cell membrane structure and function, various types of absorption. Intracellular organelles and their functions, briefly on cytoskeleton	2
14	Nutrition; Introduction, Importance of nutrition Calorific values, Respiratory quotient – Definition, and its significance Energy requirement of a person - Basal	8

	metabolic rate: Definition, Normal values, factor affecting BMR Special dynamic action of food Physical activities - Energy expenditure for various activities. Calculation of energy requirement of a person Balanced Diet Recommended dietary allowances Role of carbohydrates in diet: Digestible carbohydrates and dietary fibers Role of lipids in diet Role of proteins in diet: Quality of proteins - Biological value, net protein utilization, Nutritional aspects of proteins-essential and non-essential amino acids. Nitrogen balance Nutritional disorders	
<b>15</b>	Acid-Base balance; Acids, bases and buffers, pH. Buffer systems of the body, blood buffers, mechanism of buffer action. H <sup>+</sup> and pH measurements.	<b>3</b>
<b>16</b>	Measles and associated eye disorders, low birth weight	<b>2</b>
<b>17</b>	Free radicals – Biological Reactions-Oxidants- antioxidants, -diseases –Therapeutic uses of antioxidants	<b>3</b>
		<b>70</b>
<b>GENERAL BIOCHEMISTRY – DEMONSTRATION</b>		
<b>1</b>	1.Reaction of monosaccharides- disaccharides- qualitative 2.Estimation of Glucose 3.Estimation of proteins- ninhydrin reaction 4.Estimation of Vitamin C 5.Estimation of Vitamin A	
		<b>20</b>

**GENERAL BIOCHEMISTRY DEMONSTATION; -20 hours**

1. Reactions of monosaccharide's-disaccharides- qualitative
2. Estimation of Glucose
3. Estimation of proteins- Ninhydrin
4. Estimation of Vitamin A
5. Estimation of Vitamin c

**Total theory hours; 70**

**Practical- 20**

Recommended Text books

1. Text book of Biochemistry Sathyanarayan
2. Text book of Biochemistry A.C Deb
3. Text book of Biochemistry S.K dasgupta
4. Biochemistry of the eye David. R. whilehart

**FUNCTIONAL ENGLISH AND COMMUNICATION**

<b>SL NO</b>	<b>TOPICS</b>	<b>HOURS</b>
1	Functional English -Grammar ✓ Components of a sentence – Verb -Transformation of sentences – Voice - Reported speech - Positive/ negative -Statement/ Interrogative - Subject verb agreement - Common errors – Exercises	30
2	Vocabulary ✓ Synonyms and antonyms - Idioms and phrases – Similies -Words denoting assemblage	
3	Writing skills ✓ Note making – Summarizing - Report writing - Letter writing -Expansion of an idea - Comprehension	
<b>COMMUNICATION</b>		
1	Introduction ✓ Communication process - Elements of communication - Barriers of communication and how to overcome them	
2	<i>Speaking</i> ✓ Importance of speaking efficiently - Voice culture - Preparation of speech - secrets of good delivery - Audience psychology handling - Presentation skills - Conference/ Interview technique	
3	<i>Listening</i> ✓ Importance of listening - Self-awareness about listening -Action plan execution - Barriers in listening - Good and persuasive listening	
4	<i>Reading</i> ✓ What is efficient and fast reading? - What is Awareness of existing reading habits - Tested techniques for improving speed - Improving concentration and comprehension through systematic study	
5	<i>Memory</i> ✓ What is memory, Brain- mind potential? - Systems for memorizing - Summary page - Building positive mental habits	
6	<i>Nonverbal Communication</i> ✓ Basics of nonverbal communication	
7	Self-awareness ✓ Self-image - Self talk – Relaxation - Personality development	
		<b>30 Hrs</b>

## MATHEMATICS

SL NO	TOPICS	HOURS
1	Trigonometry 1.1. Measurements of angles- Definition of radian and its magnitude 1.2. Trigonometrical ratios- relations between them – simple problems - Signs of trigonometric ratios- ratios of well-known angles - Applications of trigonometrical ratios to solving simple problems on refraction and reflection 1.3.Idea of allied angles – Formulae only for Sin [A+ B], Cos [A+B],Tan [ A+B], Sin 2A, Cos 2A, Tan 2A in terms of products of trigonometrical ratios Sin A, Cos A, Tan A in terms of ratios of A/2- Problems	30
2	Differential Calculus 2.1. Functions and Limits- $\lim_{x \rightarrow 0} \frac{\sin x}{x}$ 2.2. Differentiation – Algebraic and trigonometric functions –inverse trigonometric functions – successive differentiation- second order differentiation	
3	Algebra 3.1 Revision of simple linear and quadratic equations 3.2 Theory of indices- Logarithms – common and Napierian Permutations, Combinations and binomial theorem	
4	Integral calculus 4.1 Integration of algebraic and trigonometric functions 4.2 Integration by substitution and by parts – Definite Integrals	
5	Geometrical application of integration 5.1 Simple concepts of area , volume , length of arc and surface of revolution	
6	Matrices 6.1.Determinants - matrix algebra	
7	Vectors 7.1Simple concepts – scalars, vectors , dot and cross product	
		<b>30 Hrs</b>

## BASIC ACCOUNTANCY

## SECOND YEAR B.Sc. OPTOMETRY

- Optometric Optics & Dispensing Optics
- Visual Optics
- Optometric Instruments & Clinical Examination of Visual System
- Pathology & Microbiology (Sec A) Pharmacology (Sec B)

### OPTOMETRIC OPTICS (THEORY)

SL NO	TOPICS	HOURS
1	Introduction – Light, Mirror, Reflection, Refraction and Absorption	1
2	Prisms – Definition, properties, Refraction through prisms, Thickness difference, Base-apex notation, uses, nomenclature and units, Sign Conventions, Fresnel's prisms, rotary prism	5
3	<b>Lenses – Definition, units, terminology used to describe, form of lenses</b>	3
4	<b>Vertex distance and vertex power, Effectivity calculations</b>	3
5	<b>Lens shape, size and types i.e. spherical, cylindrical, Sphero-cylindrical &amp; Toric lenses</b> Astigmatic lenses, Methods of writing prescriptions Axis Direction of astigmatic lenses Properties of crossed cylinders	2
6	<b>Transpositions – Simple, Toric and Spherical equivalent</b>	2
7	<b>Prismatic effect, centration, decent ration and Prentice rule, Prismatic effect of Plano-cylinder and Spherocylinder lenses</b>	6
8	<b>Spherometer &amp; Sag formula, Edge thickness calculations</b>	4
9	<b>Magnification in high plus lenses, Minification in high minus lenses</b>	3
10	<b>Tilt induced power in spectacles</b>	2
11	<b>Aberration in Ophthalmic Lenses</b>	2
12	<b>Raw materials – History and General Outline, Manufacturing of Ophthalmic Blanks – Glass &amp; Plastics, Terminology used in Lens Workshops, Surfacing process from Blanks to lenses</b>	6
13	<b>Definition &amp; Materials (Glass, Plastics, Polycarbonate, Triology) types and characteristics</b>	5

14	Properties (Refractive index, specific gravity, UV cut off, impact resistance – include drop ball test, abbe value, Center thickness)	5
15	Best form of lenses & Safety standards for Ophthalmic lenses (FDA, ANSI, ISI, Others)	3
16	Design of High Powered Lenses Hi-index lenses, Calculation of Refractive index	3
17	Bifocal designs, their manufacturing & uses (Kryptok, Unis D, Executive, Invisible, Occupational)	7
18	Progressive Addition Lenses, modified near vision lenses (designs, advantages, limitations)	4
19	Lens enhancements (Scratch resistant coatings – spin/dip, Anti-reflection coating, UV coating, Hydrophobic coating, anti-static coating)	5
20	Lens defects – Description and Detection	3
21	Glazing & edging (manual & automatic)	3
22	Special lenses <ul style="list-style-type: none"> <li>➤ Lenticulars</li> <li>➤ Aspherics</li> <li>➤ Fresnel lenses &amp; Prisms</li> <li>➤ Aniseikonic lenses</li> <li>➤ Photochromics</li> <li>➤ Polaroids</li> <li>➤ Tinted lenses – Tints, filters</li> </ul>	8
23	Project to ensure awareness on lens availability in Indian market	
24	History of Spectacles, manufacturing overview, Definition, parts & measurements Classification of frames – Materials (cover in detail), Colours and Temple position (advantages & disadvantages, where to use)	3
		5
25	Special purpose frames (sports, kids, reading)	2
		95 Hrs

## DISPENSING OPTICS

SL NO	TOPICS	HOURS
1	Components of spectacle prescription & interpretation, transposition, Add and near power relation	2
2	Frame selection – based on spectacle prescription,	4

	professional requirements, age group, face shape	
3	Measuring Inter-pupillary distance (IPD) for distance & near, bifocal height	2
4	Lens & Frame markings, Pupillary centers, bifocal heights, Progressive markings & adjustments – facial wrap, pantoscopic tilt	2
5	Recording and ordering of lenses (power, add, diameter, base, material, type, lens enhancements)	2
6	Neutralization – Hand & lensometer, axis marking, prism marking	4
7	Faults in spectacles (lens fitting, frame fitting, patient's complaints, description, detection and correction)	3
8	Final checking & dispensing of spectacles to customers, counseling on wearing & maintaining of spectacles, Accessories – Bands, chains, boxes, sleeves, cleaners, screwdriver kit	2
9	Spectacle repairs – tools, methods, soldering, riveting, frame adjustments	2
10	Special types of spectacle frames <ul style="list-style-type: none"> <li>➤ Monocles</li> <li>➤ Ptosis crutches</li> <li>➤ Industrial safety glasses</li> <li>➤ Welding glasses</li> </ul>	2
11	Frame availability in Indian market	
		<b>25</b>

#### RECOMMENDED BOOKS

- |   |   |
|---|---|
| 1. Principles of Ophthalmic lenses        | M.O.Jalie – 2 <sup>nd</sup> edition                       |
| 2. System for ophthalmic dispensing       | Clifford.W.Brooks, Irwin.M.Borish                         |
| 3. Clinical Optics                        | Troy Fannin, Theodore Grosvenor – 2 <sup>nd</sup> edition |
| 4. Ophthalmic lenses & Dispensing         | M.O.Jalie – 2 <sup>nd</sup> edition                       |
| 5. Practical aspects of ophthalmic optics | Margeret Dowaliby – 4 <sup>th</sup> edition               |

#### VISUAL OPTICS (THEORY)

SL NO	TOPICS	HOURS
1	1.REVIEW OF GEOMETRIC OPTICS 1.1 Vergence and power 1.2 Conjugacy, Object space and image space 1.3 Sign convention 1.4 Spherical refracting surface 1.5 Spherical Mirror, catoptric power 1.6 Cardinal points	5

	1.7 Magnification 1.8 Light and visual function , Clinical Relevance of: Fluorescence, Interference, Diffraction, Polarization, Bi-refringence, Dichroism 1.9 Aberration and application Spherical and Chromatin	
2	OPTICS OF OCULAR STRUCTURES 2.1 Cornea and aqueous 2.2 Crystalline lens 2.3 Vitreous 2.4 Schematic and reduced eye	3
3	Basic Aspects of Vision. <ul style="list-style-type: none"> <li>• Visual Acuity</li> <li>• Light and Dark Adaptation</li> <li>• Color Vision</li> <li>• Spatial and Temporal Resolution</li> <li>• Science of Measuring visual performance and Application to Clinical Optometry</li> </ul>	5
4.	REFRACTIVE ANOMALIES AND THEIR CAUSES 4.1 Etiology of refractive anomalies 4.2 Contributing variabilities and their ranges 4.3 Populating distributions of anomalies 4.4 Optical component measurement 4.5 Growth of eye in relation to refractive errors	05
5	VISUAL ACUITY 5.1 Definition, specification, Conversion, measurement & Recording (Distance&Near) 5.2 Test types (Distance & Near) – standard, choice, types, construction 5.3 Illumination of consultation room 5.4 Contrast sensitivity– Definition, charts available, measurements and recordings 5.5 Trial set & Trial frame & Phoropter – advantages and disadvantages	5
6	REFRACTIVE CONDITIONS Aetiology, optical condition, types, clinical features and management 1.1 Emmetropia/Ametropia 1.2 Myopia 1.3 Hyperopia 1.4 Astigmatism 1.5 Anisometropia And Aniseikonia 1.6 Presbyopia 1.7 Aphakia and pseudophakia, Biometry 1.8 Axial Vs Refractive Ametropia	18
7	ACCOMMODATION 7.1. Mechanism 7.2. Range & Amplitudes of accommodation 7.3. Anomalies of accommodation	03
8	CONVERGENCE 8.1. Types, measurement & Anomalies 8.2. Relation between accommodation & convergence	02
9	Retinoscopy (Static & Dynamic) 9.1. Principle, instrumentation & Types 9.2. Procedure & Interpretation of findings – Transposition & Spherical equivalent 9.3. Dynamic retinoscopy – various methods 9.4. Radical retinoscopy & Mohindra’s near retinoscopy 9.5. Subjective refraction – Principle, astigmatic chart, binocular balancing & binocular refraction 9.6. Cycloplegic refraction	12

10	EFFECTIVE POWER & MAGNIFICATION 10.1. Ocular refraction Vs Spectacle refraction 10.2. Ocular accommodation Vs Spectacle accommodation 10.3. Spectacle magnification & Relative spectacle magnification 10.4. Retinal image blur – Depth of focus & Depth of field	02
		60 Hrs

### VISUAL OPTICS - PRACTICAL

SL NO	TOPICS	HOURS
Part I	1. Study of purkinje images I & II, III & IV 2. Mathematical models of the eye- Emmetropia, Hyperopia, & Myopia 3. Effect of trial lenses & accessories in front of the eye	<b>60</b>
Part II	1. Visual acuity ✓ Measurement & recording (Distance & Near) 2. Retinoscopy – Practice of retinoscopy (Dry & wet) in ✓ Emmetropia, Myopia, Hypermetropia, Astigmatism, Anisometropia, Presbyopia, Aphakia, Pseudophakia, media opacities, strabismus & Eccentric fixation ✓ Interpretation of retinoscopic findings ✓ Subjective verification ✓ Prescription writing ✓ Methods of differentiating axial Vs Refractive ametropia ✓ Dynamic retinoscopy – Methods 3. Accommodation & Convergence ✓ Measurement of range & Amplitude of accommodation ✓ Measurement of Near point of Convergence	
		<b>60</b>

## OPTOMETRIC INSTRUMENTS

SL NO	TOPICS	HOURS
1	Pre examination history	02
2	Refractive Instruments 1.1 Visual acuity charts, Features, Advantages & disadvantages, newer developments 1.2 . Trial case lenses – best form lenses 1.3 . Trial frame design – Phoropter – Advantages & Difficulties 1.4 . Retinoscope – Optics, types, adjustments & special features 1.5 . Autorefractometer – Schenier’s and other optical principles, Features, Advantages & disadvantages, newer developments 1.6 Vision analyzer 1.7 Potential Acuity Meter, 1.8 Pupilometer ,	10
3	Corneal Diagnostics Keratometer 1.1. Keratometric principle 1.2. Types – Bausch & Lomb, Javal-Schiotz models 1.3. Measurement, Documentation & Interpretation of data Corneal topography 2.1. Placido’s disc 2.2. Photokeratoscope 2.3. Topography Modelling System 2.4. ORBSCAN & PENTACAM Aberrometer 3.1 Principle 3.2 Instrumentation, clinical procedure & Interpretation Pachymeter 4.1 Principle, Types 4.2 Instrumentation & Clinical procedure, Indications	18
4	Lens checking instruments 3.1. Optometer principle 3.2. Badal & non-badal principle – advantages & disadvantages 3.3. Lens gauge or clock 3.4. Hand neutralization	06
5	Slit Lamp 4.1. Slit-lamp systems 4.2. Mechanical design 4.3. Illumination techniques 4.4. Accessories 4.5. Scanning laser devices	09
6	Glaucoma Diagnostics Tonometer 1.1. Types, principle & standardization (Schiotz, Applanation & NCT) 1.2. Measurement, documentation & interpretation of results Field of Vision and Screening Devices 2.1. Introduction – Visual fields & boundaries of visual fields	07  15

	2.2. Visual field screening devices – Central & Peripheral 2.3. Quantitative perimetry – Manual & Automated 2.4. Results & Analysis of visual field examination Gonioscope 3.1. Principle & Instrumentation 3.2. Direct Gonioscope 3.3. Indirect Gonioscope Optical Coherence Tomography 4.1 Anterior and Posterior OCT 4.2 Principle & Instrumentation 4.3 Clinical Procedure & Interpretation Glaucoma imaging & newer developments	04  05
7	Color vision testing devices 8.1. Color vision theories 8.2. Common color vision defects 8.3. Pseudoisochromatic test plates 8.4. Color arrangement tests 8.5. Interpretation & clinical significance of findings	09
8	Ophthalmoscopes 10.1. Optical principle & Types 10.2. Direct ophthalmoscope – Instrumentation, Characteristics clinical procedure & Uses 10.3. Indirect ophthalmoscope – Instrumentation, Characteristics, clinical procedure & Uses 10.4. Direct ophthalmoscope Vs Indirect ophthalmoscope\ 10.5 Fundus biomicroscope- Principle & Instrumentation, Characteristics clinical procedure & Uses	08
9	Ophthalmic Ultrasonography 14.1. Physics of Ultrasonography 14.2. A-scan – Procedure & clinical uses 14.3. B-Scan – Procedure & Clinical uses	
10	Electrophysiology – ERG, VEP & EOG Principle & Instrumentation, Characteristics clinical procedure & Uses, interpretation of report	06
11	Fundus camera & Fluorescein angiography	03

### CLINICAL EXAMINATION OF VISUAL SYSTEM

SL NO	TOPICS	HOURS
1	History of the ophthalmic subject 1.1. Ocular history 1.2. Medical history 1.3. Family history 1.4. Systemic history	100
2	Assessment of visual acuity 2.1. Distance & Near visual acuity 2.2. Color vision & Contrast sensitivity	
3	Examination of Extra Ocular Muscle balance	
4	Assessment of accommodation & Convergence	
5	Pupil evaluation & Measurement of Inter pupillary distance (IPD)	

6	Slit Lamp examination 6.1. Examination of eye lids, conjunctiva & sclera 6.2. Examination of cornea & lens 6.3. Examination of iris, Ciliary body & pupil	
7	Examination of Intra ocular pressure – Schiötz & Applanation	
8	Assessment of angle of anterior chamber	
9	Ophthalmoscopy – Direct & Indirect	
10	Optic disc evaluation	
11	Examination of Lacrimal system	
12	Examination of orbit	
13	Macular function tests	
14	Visual field charting – Central & Peripheral

| 6. Investigative techniques & Ocular examination | Sandip Doshi, William Harvey   |
| 7. Diagnosis of defective color vision           | Jennifer birch – 2 <sup>nd</sup> edition                               |

### Pharmacology

SL No.		TOPICS	HOURS
1		GENERAL PHARMACOLOGY	5
		1.1 Introduction and sources of drugs Routes of drug administration	1
		1.2 PHARMACOKINETICS – Absorption and bioavailability Distribution Biotransformation Excretion	2
		1.3 PHARMACODYNAMICS- Types and Mechanism of action Factors affecting Adverse drug reactions	2
2.		SYSTEMIC PHARMACOLOGY	24
	2.1 ANS	Introduction, neurotransmitters and mechanism of action	1
		Ophthalmic Uses and adverse effects of drugs affecting autonomic nervous system.	4
		Skeletal muscle relaxants	1
	2.2 CVS	ANTIHYPERTENSIVES	1
		ANTIANGINAL DRUGS	1
	2.3 RENAL	DIURETICS –EMPHASIS ON DRUGS USED IN OCCULAR DISORDER	1
	2.4 CNS	SEDATIVE HYPNOTICS	1
		ALCOHOL	
		GENERAL ANDLOCAL ANESTHETICS	1

		OPOIDS	1
		NON STEROIDAL ANTIINFLAMMATORY AGENTS	1
		Antihistaminics mast cell stabilizers	

	2.5 CHEMOTHE RAPY	General Chemotherapy Examples/classification, antibacterial activity uses and adverse effects of Sulphonamides and fluoroquinolones Beta lactam antibiotics Tetracyclines and chloramphenicol Macrolides Aminoglycosides Others: Polymyxin Bacitracin	5
		Specific chemotherapy- in brief Antifungal Antiviral Antitubercular Antileprotics	3
	2.6 HORMONES	Corticosteroids Antidiabetics	2
	2.7 BLOOD	Coagulants	1
3		OCCULAR PHARMACOLOGY	4
		3.1 Ocular formulations and Ocular routes of administration drug delivery system and special ocular drug delivery system	2
		3.2 Ocular pharmacokinetics Delivery methods of Ocular Medication: Residence in the conjunctival sac, drug vehicles affect drug delivery, advanced ocular delivery systems,	1
		3.3 drugs induced Ocular toxicity	1
4		DIAGNOSTIC AND THERAPEUTIC APPLICATIONS OF DRUGS IN OPHTHALMOLOGY	11
		4.1 DRUGS USED TO ASSIST IN OCULAR DIAGNOSIS Anterior Segment and External Diagnostic Uses Posterior Segment Diagnostic Uses	1
		4.2 Drugs and biological agents used in ocular surgery Anesthetics used in ophthalmic procedures Presurgical Antiseptics Viscoelastic Substances Ophthalmic Glue Anterior Segment Gases Vitreous Substitutes Surgical Hemostasis and Thrombolytic Agents	2
		4.3 Drug s used in treatment of Glaucoma, Esotropia Ocular myasthenia	1
		4.3 Pharmacotherapy of ocular infections- Bacterial Viral Fungal and Chlamydial Protozoal	1
		4.4 Drugs used in allergic conditions, inflammatory disorders and degenerative disorders of the eye	1
		4.5 Immune modulators in ophthalmic practice	1

	4.6 Other agents used in ophthalmic practice Mydriatics and Miotics Enzymes Trace elements Antioxidants Wetting Agents, Tear Substitutes, Osmotic Agents	2
	4.7 Miscellaneous Botulinum Toxin Type A in the Treatment of Strabismus, Blepharospasm, and Related Disorders Agents Used to Treat Blind and Painful Eye VITAMIN A	2

1. The pharmacological basis of therapeutics Goodman Gilman 13th edition
2. Essentials of Medical Pharmacology KD Tripathi
3. Bartlett and Jaanus: Clinical Ocular Pharmacology
4. T S MAUGER & E L CRAIG - MOSBY'S - OCULAR DRUG HANDBOOK

### MICROBIOLOGY

SL NO	TOPICS	HOURS
I	<ol style="list-style-type: none"> <li>1. Sterilization and Disinfection generally used in laboratory and hospital practice</li> <li>2. Details of common bacteria, viruses and other organisms</li> <li>3. Morphology and principles of cultivation of bacteria</li> <li>4. Common bacterial infections of the eye</li> <li>5. Common fungal infections of the eye</li> <li>6. Common viral infections of the eye</li> <li>7. Common parasitic infections of the eye</li> </ol>	15

### RECOMMENDED BOOKS

1. Text book of microbiology Ananth Narayan
2. Text book of microbiology- C.P Baveja
3. Ocular Microbiology- P.K. Mukherjee, Preeti Bandyopadhyay

### PATHOLOGY

SL NO	TOPICS	HOURS
	<ol style="list-style-type: none"> <li>1. General introduction</li> <li>2. Inflammation and repair</li> <li>3. Infections [Tuberculosis, Leprosy, Syphilis, Fungus, Virus, Chlamydiae]</li> <li>4. Genetic abnormality</li> <li>5. Hematology [Anemia, Leukemia, Bleeding disorders]</li> <li>6. Circulatory disturbances [Shock, edema, Thrombosis, Infarction, Embolism]</li> </ol>	

	7. Clinical pathology [Examination of urine and blood smears] 8. Ophthalmic wound healing 9. Eyelid [normal and pathology including inflammations and tumours] 10. Cornea [Normal and pathology in degeneration and dystrophies] 11. Lens [normal and pathology of cataract] 12. Retina [normal and pathology in inflammatory diseases, infections] 13. Intraocular tumours [Retinoblastoma and choroidal melanoma] 14. Orbit [inflammation and neoplasia] 15. Optic nerve [normal and tumours]	15
--	--	----

### RECOMMENDED BOOKS

- |                           |             |
|---------------------------|-------------|
| 1. General pathology      | Harsh Mohan |
| 2. Text book of Pathology | N.C.Dey     |
| 3. Basic Pathology        | Robbins     |

### CLINICAL PSYCHOLOGY

SL NO	TOPICS	HOURS
	1. Introduction to psychology 2. Intelligence, Learning, Memory, Personality, Motivation 3. Body integrity- one's body image 4. Patient in his Milan 5. Self-concept of the therapist, Therapist patient relationship-some guidelines 6. Illness and its impact on the patients 7. Maladies of the age and their impact on the patient's own and others concept of his body image 8. Adapting changes in vision 9. Why Medical Psychology needs / demands commitment?	20

### PUBLIC RELATIONS

SL NO	TOPICS	HOURS
	<ol style="list-style-type: none"><li>1. Media and public relations</li><li>2. Communication sensitivity - Oneway- twoway communication - Listening evaluation- Active listening</li><li>3. Persuasive communication - Barriers to communication</li><li>4. Interpersonal Relationship – conflict management</li><li>5. Group process - Case discussion</li><li>6. Creative problem solving</li><li>7. Public relation and education</li><li>8. PR relevance in Indian context- Discussions</li><li>9. Behaviour modification</li><li>10. Perception and personality</li><li>11. PR and hospitals</li><li>12. Leadership process</li><li>13. Conclusion- Relationship of these input to PR</li></ol>	15
		<b>15 Hrs</b>

### HOSPITAL PROCEDURE

SL NO	TOPICS	HOURS
	<ol style="list-style-type: none"><li>1. General idea about the role, importance and procedures of the following within the hospital set up]</li><li>2. Medical records</li><li>3. Medical photography</li><li>4. Computer networking system</li><li>5. Laboratory technology</li></ol>	10
		<b>10 Hrs</b>

## THIRD YEAR B.Sc. OPTOMETRY

- Contact Lens
- Systemic Diseases (Sec A) and Ocular Diseases (Sec B)
- Low vision aids & Geriatric Optometry
- Research Methodology & Statistics
- Pediatric Optometry, Squint and Binocular Vision and advance in optometry
- Practice management, law in optometry (Sec A) & occupational optometry (Sec B)

### CONTACT LENS (THEORY)

SL NO	TOPICS	HOURS
1	1.1. Introduction to CL (Defination /Types) 1.2 History of Contact Lens 1.3 Review of Ocular Anatomy & Physiology A. Lids B. Tearfilm C. Lacrimal Apparatus D. Cornea E. Conjunctiva	6
2	2.1. Glossary of terms – Contact lenses 2.2. Optics of Contact Lens A. Magnification & Visual Field B. Accommodation & Convergence C. Back/Front Vertex Power (Vertex Distance Calculation) D. Axial & Refractive Ammetropia 2.3 Contact Lens materials A. Monomer/Polymer B. Properties of CL Material (RGP& SCL) 2.4 Manufacturing of CL (RGP, SCL& SOFT TORIC) 2.5. Indications & Contraindications	12
	3.1. Contact Lens Design & Parameters A. RGP contact lens design B. Soft Contact lens design 3.2 Preliminary Examination A. Instruments & Its use in Contact Lens Practice (Pachymeter/Specular Microscopy/ Keratometer/Placido Disc /Corneal Topography, Slit Lamp Biomicroscope) B. Steps of Preliminary Examination C. Significance of each steps 3.3 Parameter Selection (Base Curve/ Diameter) 3.4. Fitting philosophies	8

	<p>4.1 Types of CL</p> <p>A. Soft Contact Lens(SCL)</p> <p>B. Soft toric Contact Lens (SOFT TORIC)</p> <p>C. Rigid gas Permeable Contact Lens(RGP)</p> <p>Indication, Parameter selection,Modification,Fitting assessment &amp; Recording, Final Prescription, Dispensing &amp; Follow up Visit with Examination for each type of CL</p> <p>4.2 Fitting in astigmatism – Toric CL</p> <p>A. Stabilization Technique</p> <p>4.3 Handling of Contact Lens (RGP/SCL/SOFT TORIC)</p> <p>A. Insertion &amp; Removal (RGP/SCL/SOFT Toric)</p> <p>B..Do's &amp; Don'ts</p>	10
	<p>5.1. Wearing Modalities/Replacement Schedule</p> <p>5.2 Care &amp; Maintenance (RGP/SCL)</p> <p>A. Cleaning Agent &amp; Importance</p> <p>B. Rinsing agent &amp; Importance</p> <p>C. Disinfecting Agent &amp; Importance</p> <p>D. Lubricating &amp; Enzymatic Action</p> <p>5.2 Lens care and hygiene, instructions, compliance</p> <p>5.3. Contact Lens solutions</p> <p>5.4 Care of contact lenses</p>	7
	<p>6.1 Contact Lens Deposits (RGP/SCL)</p> <p>6.2 Complication of contact lens ( RGP /SCL)</p>	6
	<p>7.1 Speciality Contact Lens</p> <p>A. Therapeutic Contact Lens (Indication / Fitting Assessment)</p> <p>B. Peaditric Contact Lens Fitting (Aphakia &amp; Pseudophakia)</p> <p>C. Post Refractive Surgery</p> <p>D. Fitting in irregular astigmatism – Keratoconus/PMD etc</p> <p>E. Contact lenses for special purposes – Swimming, sports, occupational etc</p> <p>F. Orthokeratology</p> <p>7.2 Bifocal Contact Lens (Types/Indication/Fitting assessment)</p>	7
	<p>8.1. Modifications of finished CL</p> <p>8.2. Inspection &amp; Verification of finished contact lenses</p>	2
	Review of Contact lenses & Solutions available in India	01
	<p>10.1. Recent developments in contact lenses</p> <p>10.2. Current contact lens research.</p>	1
		<b>60</b>

### CONTACT LENS PRACTICALS

SL NO	TOPICS	HOURS
1	1.1. Fitting & Dispensing of contact lenses in Myopia, Hyperopia, Astigmatism, Presbyopia, Anisometropia, Aphakia, Pseudophakia, Keratoconus, PMD etc 1.2. Paediatric contact lens fitting 1.3. CL fitting following ocular surgeries 1.4. Visit to factories manufacturing contact lenses	20

### RECOMMENDED BOOKS

1. Contact Lenses	Antony.J.Philips, Janet Stone
2. Textbook of Contact Lenses	V.K.Dada – 4 <sup>th</sup> Edition
3. Contact Lens Practice	Ruben & Guillon
4. Color Atlas of Contact Lens	Montague Rubem
5. Contact Lens – The CLAO guide	Peter.R.Castle
6. IACLE – Contact Lens modules	International Association of Contact Lens Educators, Sydney, Australia
7. Manual of Contact Lens prescribing & Fitting	Milton.M.Hom – 3 <sup>rd</sup> edition
8. Manual of Gas Permeable contact Lens	Edward.S.Bennet, Milton.M.Hom – 2 <sup>nd</sup> edition
9. Clinical manual of specialized CL prescribing	Terry.R.Scheid
10. Clinical Contact Lens Practice	Edward.s.Bennet, Barry.A.weissman
11. Cosmetic Contact Lens & Artificial eyes	Devendra Kumar & Gopal Krishnan
12. Common Contact Lens Complications	lyndon.W.Jones, Deborah.A.Jones
13. Anterior segment Complication of CL wear	Joel Silbert – 2 <sup>nd</sup> edition
14. Contact lens practice	Natthan Effron

### OCULAR DISEASES

SL NO	TOPICS	HOURS
1	<b>EYELIDS</b> 1.1 Eye lid anatomy review 1.2 Congenital anomalies Blepharophimosis, Epicanthus, Cryptophthalmos, Coloboma, Hemangioma 1.3 Acquired disorders External and Internal hordeolum, Chalazion, Lid oedema, Blepharitis, Blepharospasm 1.4 Eyelid tumours Evaluation, Benign lesions, Malignant tumours 1.5 Malpositioning disorders Ectropion, Entropion, Trichiasis, Distichiasis, Symblepharon, Ankyloblepharon, Eyelid retraction, Lagophthalmos, Poliosis, Madarosis 1.6 Ptosis Classification, Clinical evaluation and Management 1.7 Eyelid trauma	5
2	<b>LACRIMAL SYSTEM</b>	4

	2.1 Lacrimal anatomy review 2.2 Methods of Lacrimal evaluation 2.3 Congenital and developmental anomalies 2.4 Infections of lacrimal system 2.5 Tumours of lacrimal system 2.6 Lacrimal trauma 2.7 Dry eye and Watering  Etiology , Clinical evaluation and Management	
3	<b>ORBIT</b> 3.1 Orbital anatomy 3.2 Evaluation of orbital disorders 3.3 Congenital and developmental anomalies of orbit Anophthalmos, Microphthalmos, Nanophthalmos, Cryptophthalmos, Hypertelorism, Craniofacial anomalies, Craniosynostosis 3.4 Orbital tumours Dermoids, Hemangiomas, Rhabdomyosarcoma, Optic nerve glioma, Meningiomas, 3.5 Orbital inflammations Preseptal cellulitis, Orbital cellulitis, Orbital periostitis, Cavernous sinus thrombosis, Sinus related disorders 3.7 Orbital trauma Blow out fractures 3.8 Proptosis Etiology, Classifications, clinical evaluation and Management 3.9 Graves Ophthalmopathy Etiology, Examination, and Management 3.10 Enophthalmos  Etiology, Evaluation and Management	4
4	<b>SCLERA</b> 4.1 Sclera anatomy review 4.2 Blue sclera 4.3 Scleral Degenerations Ectasia and staphyloma 4.4 Scleral Inflammations Scleritis and episcleritis  4.5 Toxic and traumatic injuries of sclera	2
5	<b>CONJUNCTIVA and CORNEA</b> 5.1 Anatomy review  <u>A) Conjunctiva</u> 5.2 Examination techniques 5.3 Inflammations of Conjunctiva Conjunctivitis (classification, etiology, evaluation and management) 5.4 Degenerative conditions Pinguecula, Pterygium, Concretions 5.5 Symptomatic conditions Hyperaemia, Chemosis, Ecchymosis, Xerosis, Discoloration, Papillae, Follicles, Hemorrhage 5.6 Cysts and tumours  <u>B) Cornea</u> 5.7 Congenital anomalies Megalocornea, Microcornea, Cornea plana, Cloudy cornea 5.8 Corneal Dystrophies Classifications, evaluation and management 5.9 Corneal degenerations Arcus senilis, Hassal-henle bodies, Lipoid Keratopathy, Band shaped keratopathy, Salzmann's nodular degeneration, Droplet keratopathy, Pellucid Marginal	6

	<p>Degeneration, Corneal guttata</p> <p>5.10 Keratoconus and Keratoglobus (Etiology, Classifications, Clinical evaluation and Management)</p> <p>5.11 Corneal inflammations</p> <ul style="list-style-type: none"> <li>✓ Keratitis/Ulcer (Etiology, Classifications, Evaluation and Management)</li> <li>✓ Corneal oedema</li> <li>✓ Corneal opacity and neovascularization</li> </ul> <p>5.12 Miscellaneous ocular surface disorders</p> <ul style="list-style-type: none"> <li>✓ Keratoconjunctivitis Sicca</li> <li>✓ Steven Johnson Syndrome</li> <li>✓ Benign Mucosal Pemphigoid- ocular pemphigoid</li> <li>✓ Vitamin A deficiency</li> <li>✓ Trauma and burns</li> <li>✓ Metabolic diseases associated with corneal changes</li> </ul> <p>5.13 Corneal surgeries</p> <ul style="list-style-type: none"> <li>✓ Keratoplasty</li> <li>✓ Refractive surgeries</li> </ul> <p style="text-align: center;">5.14 Slit lamp colour coding</p>	
6	<p>LENS</p> <p>6.1 Normal lens anatomy, physiology and aging process</p> <p>6.2 Congenital and Developmental defects Aphakia, Lenticonus, Lentiglobus, Coloboma, Peters anomaly, Microspherophakia, Cataract</p> <p>6.3 Acquired lenticular defects</p> <ul style="list-style-type: none"> <li>Morphological cataract</li> <li>Drug induced cataract</li> <li>Traumatic cataract</li> <li>Metabolic cataract</li> <li>Complicated cataract</li> <li>Association with other ocular disorders and syndromes</li> </ul> <p>6.4 Cataract Management</p> <ul style="list-style-type: none"> <li>Surgical and non-surgical management</li> <li>Pre-operative evaluation</li> <li>Complications of cataract surgery</li> </ul> <p>6.5 Lens displacement</p> <ul style="list-style-type: none"> <li>Lens subluxation and dislocation</li> </ul>	5

6. External examination
7. Slit lamp examination
8. Drugs and method of application
9. Do's and don'ts – Pupillary dilatation
10. Direct ophthalmoscopy
11. Indirect ophthalmoscopy
12. Instrumentation
13. Patients selection
14. Keratometry reading
15. Refraction
16. Fluorescein pattern
17. Over refraction
18. Fitting of hard lenses
19. Rigid gas permeable lenses and soft lenses in refractive errors and in specialized condition

The students are made to observe the interneers initially, then gradually they are encouraged to work up a patient and perform various examination techniques.

---

# **FOURTH YEAR B.Sc. OPTOMETRY**

- **PROJECT WORK**
- **CLINICAL POSTING & SOCIALITY POSTING**

## **LEARNING AND TEACHING STRATEGY**

The curriculum of Optometry is designed in such a way that it ensures the development of professional skills as well as behaviors of an individual that helps them to deliver a comprehensive primary eye care to the needy.

The curriculum incorporates 4 Major phases

Phase - I (First year Optometry)

The emphasis of learning is understanding & analysis of the basic sciences, philosophies, theories & skills required to develop professionally and academically. This theory oriented first year ensures a sound scientific foundation for the upcoming years.

Phase - II (Second year Optometry)

The curriculum arranged in this part allows the students to apply the basic science knowledge procured from Phase-I in the Optometry topics. The introductory clinical posting in the ophthalmic outpatient department helps them to understand and learn the primary eye care procedures.

Phase – III (Third year Optometry)

As the curriculum concentrates more on optometric patient evaluation and management, the focus is to refine the student's clinical and application skills to make him/her an Optometrist. The student will learn about the diagnostic approaches and management of various ocular disorders, binocular vision anomalies, assessment and dispensing of contact lenses and Low vision aids.

Phase – IV (Fourth year Optometry)

This one year compulsory course work program is designed to facilitate the transition from student hood to a competent optometrist.

The learning and teaching process includes;

- Lectures
  - Practical demonstration
  - Projects & Assignments
  - Seminars
-

- Case discussions
- Journal clubs
- Clinical teaching
- Industrial visits
- Community outreach

### ***CLINICAL POSTINGS***

**Aim:** To enable the students to learn the Optometric examination procedures, clinical assessment skills and management techniques which helps them to become a competent clinician.

**Description:** The students will be posted in different specialities of eye care on a rotatory basis under the supervision of experienced clinical supervisors.

#### **Clinical Posting – IInd Year:**

At the end of second year clinical postings, the students will be performing History recording (Ocular and systemic – of relevance), Visual acuity assessment and documentation (Adults & Infants), Objective and subjective refraction, Spectacle prescription, Dispensing of various types of lenses and frames, Lensometry, Keratometry, demonstrating the slit lamp illumination techniques, color vision assessment, Do's and Don'ts of pupillary dilatation, Gross ophthalmic examination etc. under experienced clinical supervisors.

TOTAL CLINICAL HOURS (IIND YEAR): **200 HOURS/YEAR**

#### **Clinical Posting – IIIrd year:**

By the completion of IIIrd year clinical posting, the students will be able to perform the following under experienced clinical supervisors.

- Optometric workup to detect the ocular disorders (Ocular & relevant systemic history, Visual acuity assessment and refraction, Slit lamp examination, applanation Tonometry, fundus evaluation)
- Contact lens workup
- Low vision workup
- Orthoptic workup

TOTAL CLINICAL HOURS (IIIRD YEAR): **575 HOURS/YEAR.**

#### **Clinical Postings – IV th year:**

Successful completion of the course work program will facilitate the students to become competent independent Optometrist. The student will be proficient in

- Complete Optometric workup including diagnosis and management
  - Contact lens workup including dispensing
  - Low vision workup, dispensing of aids and counseling
  - Orthoptic workup and non-surgical management
  - Detection of ocular diseases and referral to specialists at the appropriate stage
  - Managing an optical outlet/clinic of his/her own.
  - Screening of Ocular disorders in community outreach programmes like Camps, School screening etc.
  - Utilizing the latest technology in the diagnosis of ocular anomalies including visual field devices, Gonioscopy, imaging technology including ultrasound and retinal imaging techniques, corneal topography including ORBSCAN, Electrophysiology, etc
-

## SUPERVISED CLINICAL HOURS DURING COURSE WORK: **1800 HRS**

### **PROJECT:**

**No. of practical hrs: 144**

Each student is encouraged to take up a research project in the area of his/her liking. The project should be original and should have considerable clinical relevance. The concerned faculty members guide the student in his/her project. After completing the project, each student has to submit a complete report of their respective projects

### **PROJECT GUIDELINES**

All Bsc.optometry degree students enrolled in the Rajiv Gandhi University of Health Sciences should complete a scholarly project as partial fulfillment of requirements for the award of Bsc optometry (OPTOMETRY) degree.

#### **What is a project?**

A Project is a preliminary form of research. It is an independent investigation. It is very largely the students' own work and is to be pursued by them from the inception till completion. A master's project (non-thesis) will be completed during the third year and involves the student in a hands- on project led by a research supervisor/ faculty advisor who will choose, develop and guide the project from its inception to completion.

#### **Purpose of a project work**

The purpose of the Project Work is to enable the student to gain practical experience. It enables the student to meet program objectives through development of an appreciation of the interrelations between theory research and practice. A project forms an introduction to scientific thinking and working.

Project suggestions

Prior to the practical work, students work out a concept with their supervisor that could include any of the following points:

- Scientific question
- Educational objectives (which methods have to be mastered and understood)
- Recent trends in the respective fields
- Case study
- Prospective studies
- Retrospective studies

This scholarly project provides the student with the opportunity to participate in a mentored research experience. The student will actively participate in a research project throughout all current applicable phases of the project such as the problem statement development, review of the literature, hypotheses formation, proposal writing, study design, data collection, data analysis, and result reporting. This may be

---

done as a group project. A portfolio, paper, or poster is a presentation of those outcomes.

#### Project supervision

The supervisor schedules the project work together with the student and provides an introduction to all laboratory skills that are needed. She or he is then the contact person for all questions and problems during the project. If required, she or he may also ask for a progress report and preliminary results while the project is still ongoing.

The eligibility academic qualification and teaching experience required for recognition as research supervisor and faculty advisor by the RGUHS are:

- a. Eligibility to be a research supervisor and faculty advisor

Shall be a full time teacher in the college or institution where he or she is working.

- b. Academic qualification and teaching/professional experience for each branch

- Research supervisor (RS)- five years of teaching/ professional experience after the postgraduate qualification in a teaching institution or laboratory approved by RGUHS
- Faculty advisor (FA)- three years of teaching/ professional experience after the postgraduate qualification in a teaching institution or laboratory approved by RGUHS

- c. Age:

The age of the RS/ FA shall not exceed 65 years.

#### Assessment

Four copies of the project report should be submitted to the Principal along with a soft copy (CD), three months before the final examinations. Projects are assessed with a written report and a seminar. The written report and the presentation, as well as the practical work in the laboratory are to be included in the internal assessment. The Project report will carry 10 marks which would be assessed and awarded during the viva voce examination and added along with the viva voce marks.

### **GUIDELINES FOR THE PREPARATION OF PROJECT REPORTS**

1. The project report should be typed in Times New Roman. The size of the titles should be 14 and Bold and the size of the subtitles should be 12 and bold.
  2. The matter should have double spacing except for long quotations, footnotes and endnotes, which are single spaced. The left hand margin must be 1.5", other margins should be 1.0".
  3. The project report should be hardbound.
  4. The project report should be organized in the following subdivisions:
    - a. Title page
    - b. Certificate
    - c. Acknowledgement
    - d. List of abbreviations used
    - e. Table of contents
    - f. Introduction
-

- g. Main project
- h. Summary of the project work
- i. List of references
- j. Annexures

**a. Title page**

<-----Title----->  
 <-----Subtitle----->  
 by  
**Name of the Candidate**  
**Project Report**  
  
**In partial fulfillment**  
**of the requirements for the degree of**  
**Degree Name**  
**in**  
**Subject Name**  
**Under the guidance of**  
**Name of the RS and FA**  
**Name of the Department**  
**Name of the College**  
**Place**  
**Year**

**b. Certificate**

**CERTIFICATE BY THE RESEARCH SUPERVISOR**

This is to certify that the project report entitled "<-----Title----->" is a bonafide research work done by Name of the Candidate in partial fulfillment of the requirement for the degree of Degree Name.

**Signature of the Research Supervisor**  
**Name**  
**Designation & Department**

**Date:**

**Place:**

**ENDORSEMENT BY THE HOD, PRINCIPAL/HEAD OF THE INSTITUTION**

This is to certify that the project report entitled "<-----Title----->" is a bonafide research work done by Name of the Candidate under the guidance of Name & designation of the Guide.

**Seal & Signature of the HOD**

**Seal & Signature of the Principal**

Name

Name

Date:

Place:

**c. Acknowledgement**

The inclusion of a paper of Acknowledgment is a traditional practice in the write up of the Project Work. This permits the candidate to write a brief perface and acknowledge the help received from persons and organizations.

**d. List of abbreviations used**

**e. Table of Contents**

**f. Introduction**

This section includes a brief write up about the topic, its scope and importance as well as relation to any previous studies done in the particular topic. It should also mention any present developments.

**g. The main project**

The main project should be divided into various sections as per the demand of the topic.

**h. Summary of the project work**

**i. List of References (Vancouver Style)**

References should be numbered consecutively in the order in which they are first mentioned in the text; they should not be listed alphabetically by author or title or put in date order.

**j. Annexures**

**POINTS TO KEEP IN MIND**

- The project work should be an original document and in the candidates own language.
- The candidate should not copy or reproduce anyone else's published or unpublished project.
- Any arguments that are put forward in the project should be supported with appropriate data.
- Proper documentation of the information is very important.
- The methodology to be used should be very clearly stated in the beginning of the work.
- Plagiarism should be avoided.

**WHAT IS PLAGIARISM?**

---

Plagiarism means using another's work without giving

### **CLINICAL POSTING:**

A student after having successfully completed the final year university examination is qualified to commence the Compulsory Rotatory Internship. The completion of Internship is mandatory to enable a student to obtain the bachelor degree in OPTOMETRY

### **GUIDELINES**

- Interns should complete postings in all specialities as decided by the department
  - The interns should conduct themselves in a manner befitting the profession.
  - The intern should dress appropriately in the clinical areas
  - It is mandatory for the intern to wear the white apron with nametag while attending clinics
  - A total of 12 days' leaves can be availed for a period of one year. He/she is permitted to avail 1 day's casual leave in each posting/month or six days of casual leave at a stretch with prior permission from staff in-charge
  - If the student takes more leaves than that can be availed, they have to extend the internship equal to the period of leaves taken
  - Students are allowed to do externship only in institutions decided by the department and college on rotation basis. At least 3 months' compulsory internship has to be done in the parent institution
  - Working hours in the parent institution is from 8.30am to 5.00pm. He/she should sign the attendance register before 8.30am
  - Each intern should maintain a logbook wherever he/she is posted. The intern has to get signature from the supervising staff at the end of each posting
  - Log book should be submitted to the Head of the department at the end of each posting of internship after the period of posting
  - Accommodation for externship will be the sole responsibility of interns. Neither the department nor the college is responsible for providing accommodation
  - Feedback of interns from the respective institutions during externship is mandatory
  - Assignments/presentations given during the period of internship has to be duly undertaken and performed.
  - Internship completion certificate will be issued from the College office only after obtaining satisfactory completion certificate from the Head of the Department
  - The intern in the parent institute will get a monthly stipend. There is no stipend for off campus posting.
  - The intern will be allowed to attend the National Conference, leave will be granted only for the days of conference and travel days. Any other leave declared by the University for the students will not apply to the interns
-
